

EMPOWERING TEAMS WITH AI WORKSHOP

Designed for non-technical users, this hands-on session covers AI basics, real-world applications, and practical exercises to get your team using generative AI (GAI) effectively.

1 IMPROVE AI LITERACY

2 INCREASE AI ADOPTION

3 GET MORE DONE WITH AI

WHAT'S GENERATIVE AI?

Learn how the latest generative AI tools can quickly teach you about themselves and gain a comprehensive understanding of their capabilities and limits.

GET EXCITED ABOUT AI

Address common fears and concerns about generative AI and see examples that will get your team excited about what it can do for them.

Adam Lush, MPH

GAI strategy and training consultant
founder of Teamonics LLC,
& creator of @MindBranches on X

INCLUDES WORKBOOK

Discover the key to unlocking the power of generative AI by learning the fundamentals of effective prompting with the included workbook.
