

RELIABLE MARITIME SOLUTIONS (RMS)

Maritime Consulting, Surveying
Compliance Management

Solution You Can Rely on,
Experience You Can Trust

Who We Are

Reliable Maritime Solutions - RMS: A uniquely experienced group of Maritime Professionals with prior U.S. Coast Guard, Classification Society, and operational backgrounds. Founded in 2015, RMS has quickly established themselves as knowledgeable, capable and trusted technical consultants and ship surveyors providing critical support to our clients ranging from the largest cruise lines to small independent ship operators. We have a team of surveyors with international and domestic experience standing by to provide solutions you can rely on and experience you can trust.

Surveyors - Knowledge: Over ten years combined as Class Surveyors with DNV-GL. Our Surveyors have a strong background in international (SOLAS, MARPOL, etc.) and domestic (Code of Federal Regulations) regulations. We have experience with both US and Foreign Flagged vessels ranging from the largest cruise ships to small towing vessels. RMS has conducted Pre-purchase Surveys, Compliance Surveys, Environmental Audits, Condition Surveys, Valuations and Damage Surveys. We are knowledgeable in all aspects of surveying and will match the right specialist to your project.

Coast Guard - Experience: 50-plus years combined active duty U.S. Coast Guard experience inspecting and surveying new-build vessels, vintage vessels, large passenger vessels, small commercial vessels, tankers, and barges. RMS has worked in shipyards world-wide to survey new-build and ship repair projects. Our founders have played major roles as surveyors and instructors at the Cruise Ship Centers for both the US Coast Guard and DNV-GL. We are your one source for consulting, surveying, training and project management.

Maritime - Diversity: RMS' principles have a diverse and extensive maritime background including successful startup operations, emergency and scheduled dry docks, major repairs and revitalizations. We have experience in surveying, consulting, instructing, public speaking, expert witness and business management. We have worked globally with all the major classification societies, vendors and ship operators on new builds and ship repairs. Our technical and regulatory knowledge is acknowledged by many maritime authorities.

Operations - Leadership: Our leadership skills were forged in the fires of practical experience, formal training and in-depth knowledge then hardened with an intense sense of loyalty and integrity. Seven years of managing commercial operations at the highest levels combined with decades of supervising personnel has shaped RMS' professionals into some of the strongest leaders in the industry.
