

RELIABLE MARITIME SOLUTIONS (RMS)

Maritime Consulting, Surveying
Compliance Management

Solutions You Can Rely on,
Experience You Can Trust

Who We Are

Reliable Maritime Solutions - RMS: A uniquely experienced group of Maritime Professionals with prior U.S. Coast Guard, Classification Society, and operational backgrounds. Founded in 2015, RMS has quickly established themselves as knowledgeable and trusted technical consultants and surveyors. We have provided critical support to our clients ranging from the largest cruise lines to small independent ship operators. We have a dedicated team of professionals standing by to provide solutions you can rely on and experience you can trust.

Experience: Our founders have a combined career of over 10 years as DNV-GL Class Surveyors, over 50 years as active-duty U.S. Coast Guard Inspectors, and over 7 years in managing ship operations at the highest levels. They played major roles at the Cruise Ship Centers for both the US Coast Guard and DNV-GL. All of our surveyors have in-depth knowledge of international and domestic regulations, with experience ranging from the largest cruise ships to the small cargo vessels. We have worked in shipyards worldwide on new-builds, renovations, and repair projects.

Diversity: RMS principles have a diverse and extensive maritime background, including successful startup operations, emergency and scheduled dry docks, major repairs, and revitalizations. We have experience in surveying, consulting, instructing, public speaking, expert witness and business management. We have worked globally with all the major classification societies, vendors and ship operators on new builds and ship repairs. Our technical and regulatory knowledge is acknowledged by many maritime authorities.

Leadership: Our leadership skills were forged in the fires of practical experience, formal training, and in-depth knowledge, then hardened with an intense sense of loyalty and integrity. Seven years of managing commercial operations at the highest levels combined with decades of supervising personnel have shaped RMS' professionals into some of the strongest leaders in the industry.

We are your one source for consulting, surveying, training and project management. We will match the right specialist to your project, no matter where in the world your vessel is located.

What We Do

Surveying	Compliance	Consulting	Projects
