

GEN-U-LINE 3000 Series Urethane Line Paint Coverage Guide

Based on our experience, we have prepared a general guideline for the quantity of game line paint required per game. All figures are estimated based on a two inch line. Basketball borders and keys should be accounted for separately by calculating the square footage of the area and assuming 90 sq. ft. of coverage per 1 1/2 quart unit.

White, yellow, orange and red usually require two coats to achieve adequate hiding, which can be applied in the same day. We always recommend at least two coats of all the colors to improve the durability of the line paints. Some colors may require more paint when applied over dark color flooring products, such as white paint over a dark blue floor.

Coverage Estimate for GEN-U-LINE 3000 Series Game Line Paints:

Basketball	2 units
Volleyball	1 unit
Tennis	2 units
Badminton	2 units
Team Handball	3 units

Coverage Estimate for GEN-U-LINE 4445 Game Line Paint Primer:

Calculate one unit of 4445 Primer for every two units of GEN-U-LINE 3000 Series paints used on the project.
