CALCULATION OF DEARNESS ALLOWANCE (DA)

01. DEFINITION :-

- DA is a calculation on inflation and allowance paid to employees of Govt, Public and pensioners in India. It is calculated as a percentage of an Indian citizen's basic salary to mitigate the impact of inflation on people. The effective salary of Govt employees requires constant enhancement to help them cope up with the increasing prices.
- DA is control by Labour Bureau, Min of Labour & Employment (Gol) located at Chandigarh & Shimla. It is based on **All India Average Consumer Price Index – Industrial Workers (AIACPI-IW)**. For central Govt employees base year is 2001 = 100% and the amount of DA has been merged upto 31 Dec 2015 with Band Pay.
- Collect the price of different commodities at different centers & publishes varies types of price index like AIACPI-IW and last working day of every month will release AIACPI-IW of previous month. Note www.labourbureau.gov.in.

02. HISTORY:-

- The DA was introduced was following the 2nd World War, and was then known as the “**Dear Food Allowance**”. The “**Old Textile Allowance**” was also introduced in 1947, though this was revised and reintroduced in 1953 as the “**Revised Textile Allowance**”.
- Initially DA was given in response to demand of employees for wage revision, however later it was linked to **AIACPI-IW**. In the past various committees have been constituted to look into the issue of payment of DA to Central Govt Employees.

03. FORMULA:-

- It is calculated twice in every year i.e. **1st Jan** and **1st Jul**. The formula to calculate the DA was changed in 2006. Formula is as given :-

$$\text{DA} = \frac{(\text{AVG CPI - IW OF PAST 12 MONTHS} - \text{AVG CPI - IW OF 2015})}{\text{AVG CPI - IW OF 2015}} \times 100$$
