

2021 Board Notes & Plan - Tree Project Buckles

Buckles Rd.

Notes- In continuing on with the plan that was approved for the tree project on Wyoming and Maple a Member of the Board met with three Tree Service Companies to obtain bids to remove and plant trees along Buckles Rd. All three companies agreed with prior companies who also looked at this area that these trees are in dire shape. Three of the trees are almost 100% dead, there is one that has been cut down with the stump still remaining, and the remaining Mt. Ash trees were damaged from the main lead being chopped off (a common reason trees eventually die of disease) and the trunks damaged from weed eating and lawnmowers. Also, the trees in some areas are uprooting the asphalt and are at the start of creating a walking hazard not to mention the berries that are left on the trail that can be slippery. Diseased trees can damage or even kill other trees in their proximity. The cost of the new trees are estimated in last years invoice from Northland Nursery, included below with the bids received.

Plan- The Boards plan is to remove 12 trees and stump grind the 13 tree trunks that remain along Buckles. It then plans to plant 6 Bowhall Maples and 5 Chanticlear Pears to keep in uniformity with the trees planted along Maple. The Board also wants to have an Arborist check and trim all Rocking R's trees once every 2-3 years to make sure they are trimmed properly and continue to be healthy.
