Where Innovation Meets Crop Protection

INSECTICIDES

Insecticides (Pest Control Products)

Insecticides are essential crop protection products used to control harmful insect species in agricultural production. Effective insecticide use helps manage pest populations, supports healthy plant growth, and minimizes yield loss.

Agrimax's insecticide portfolio includes formulations effective against both sucking and chewing pests, with contact and systemic modes of action. Our products are specially developed for field crops, vegetables, fruit trees, and ornamentals, offering both fast-acting solutions and long-lasting protection.

Featured Insecticides

	Brand Name	Active Substance	Formula
1	Plenoril®	200 g/l Chlorantraniliprole	SC
2	Labidal®	50 g/l Lambda-cyhalothrin	CS
3	Syporos®	480 g/l Spinosad	SC
4	Florenta®	%50 Flonicamid	WG
5	Fenoryth®	100 g/l Pyriproxyfen	EC
6	Ematrole®	%5 Emamectin benzoate	SG
7	Diamdamide®	20% Flubendiamide	WG
8	Esfanix®	200 g/l Esfenvalerate	EC
9	Catemor®	20% Acetamiprid	SP
10	Lufgard®	50 g/l Lufenuron	EC
11	Pestaram®	100 g/l Spirotetramat	SC
12	Liprosect®	100 g/l Cyantraniliprole	OD
13	Acetronex®	200 g/l Acetamiprid	SL
14	Croptanil®	%35 Chlorantraniliprole	WG
15	Indamix®	%30 Indoxacarb	WG
16	Melathor®	240 g/l Methoxyfenozide	SC

Product Advantages:

Broad-spectrum activity
Low residue, environmentally and human health-friendly formulations
Active ingredients suitable for resistance management
Easy application and high performance

Featured Insecticides

	Brand Name	Active Substance	Formula
17	Fynexil®	240 g/l Metaflumizone	SC
18	Seliora®	%25 Spinetoram	WG
19	Daforyl®	500 g/l Pyridalyl	EC
20	Carylin®	%50 Pirimicarb	WG
21	Cynoryx®	%75 Cyromazine	WP
22	Drelonix®	%25 Deltamethrin	EC
23	Cyperox®	250 g/l Cypermethrin	EC
24	Malotrin®	650 g/l Malathion	EC
25	Sulthrin®	240 g/l Sulfoxaflor	SC
26	Tarenix®	500 g/l Pirimifos methyl	EC
27	Dellcide®	50 g/l Deltamethrin	SC
28	Fosmetix®	%50 Phosmet	WP
29	Lambacide®	%10 Acetamiprid + %3 Lambda-cyhalothrin	WG
30	Abindor®	75 g/l Indoxacarb + 18 g/l Abamectin	OD
31	Selithor®	300 g/l Methoxyfenozide + 60 g/l Spinetoram	SC
32	Feluten®	222 g/l Flubendiamide	SC

Agrimax[®]

Where Innovation Meets Crop Protection

FUNGICIDES

Fungicides (Disease Control Products)

Fungicides are plant protection products used to control fungal pathogens that cause diseases in crops. When applied correctly and at the right time, they help prevent leaf, root, and fruit diseases, improving crop quality and yield.

Agrimax's fungicide portfolio includes broad-spectrum products with both protective and curative action. Developed for use on field crops, vegetables, fruit trees, and ornamentals, our formulations offer reliable solutions for a healthy and productive harvest.

Featured Fungicides

	Brand Name	Active Substance	Formula
1	Azamex®	250 g/l Azoxystrobin	SC
2	Bopiran®	25.2 g/l Boscalid + 12.8 Pyraclostrobin	WG
3	Syltrix®	%80 Fosetyl-Al	WP
4	Zynothal®	%50 Captan	WP
5	Hymatron®	360 g/l Hymexazole	SL
6	Cimynox®	%50 Cymoxanil	WP
7	Profludix®	%37.5 Cyprodinil + %25 Fludioxonil	WG
8	Zarvion®	100 g/l Penconazole	EC
9	Trivora®	%25 Tebuconazole	WP
10	Xymeron®	%30 Cymoxanil + 22,5 Famoxadone	WG
11	Dinoril®	%50 Cyprodinil	WG
12	Sylorix®	%50 Kresoxim methyl	WG
13	Thalorin®	%50 Trifloxystrobin	WG
14	Vorynal®	%55 Metiram + %4.8 Cymoxanil	WG
15	Thimetra®	%70 Thiophanate-methyl	WP
16	Krebalid®	200 g/l Boscalid + 100 g/l Kresoxim-methyl	SC

Product Advantages:

Protects crops from fungal diseases, ensuring healthier and stronger plants.

Prevents yield loss by controlling and reducing the spread of harmful fungi.

Improves the quality and market value of harvested produce.

Supports sustainable farming by reducing disease pressure and increasing productivity.

Helps maintain long-term soil and plant health by minimizing fungal infestations.

	Brand Name	Active Substance	Formula
17	Ulvoria [®]	200 g/l Tebuconazole + 120 g/l Azoxystrobin	SC
18	Darnith [®]	%25 Fludioxonil + 10 g/l Metalaxyl-m	FS
19	Difronil [®]	250 g/l Difenoconazole	EC
20	Selvion [®]	300 g/l Spiroxamine + 160 g/l Prothioconazole	EC
21	Epothil [®]	310 Thiophanate-methyl + 187 g/l Epoxiconazole	SC
22	Fenorid [®]	500 g/l Fenhexamid	SC
23	Azoquinil [®]	75 g/l Azoxystrobin + 37,5 g/l Metalaxyl-m + 12,5 g/l Fludioxonil	FS
24	Onoryth [®]	85 g/l Pyraclostrobin + 62,5 Epoxiconazole	SE
25	Zalifor [®]	500 g/l Imazalil	EC
26	Fenomir [®]	500 g/l Metrafenone	SC
27	Flurnal [®]	125 g/l Flutriafol	SC
28	Jarnoryx [®]	25 g/l Fludioxonil + 10 g/l Metalaxyl m	FS
29	Glytharil [®]	300 g/l Cyprodinil	EC
30	Helivon [®]	65.82 g/l Copper equivalent as copper sulfate	SC
31	Trulen [®]	15% Triflumizole + 3.4% Cyflufenamid	WG
32	Tebonir [®]	2% Tebuconazole	DS
33	Cuforin [®]	25% Copper equivalent as copper sulfate	CR
34	Cuprinox [®]	30% Copper equivalent as copper hydroxide	WG
35	Velthorix [®]	35% Metalaxyl	DS
36	Texubor [®]	50% Tebuconazole + 25% Trifloxystrobin	WG
37	Javiron [®]	55% Metiram + 5% Pyraclostrobin	WG
38	Zimaryl [®]	76% Ziram	WG
39	Conzilox [®]	150 g/l Prothioconazole + 20 g/l Tebuconazole	FS

Where Innovation Meets Crop Protection

ACARICIDES

Acaricides (Mite and Spider Mite Control Products)

Acaricides are plant protection products used to control spider mites and other harmful mite species that damage crops. These pests, which proliferate rapidly especially under hot and dry conditions, can cause leaf yellowing, defoliation, and reduced photosynthesis, leading to severe yield losses.

Agrimax's high-performance solutions are suitable for field crops, vegetables, fruit trees, and ornamentals.

Featured Acaricides

	Brand Name	Active Substance	Formula
1	AbaShine [®]	18 g/l Abamectin	EC
2	Brynalith [®]	20% Pyridaben	WP
3	Heraxon [®]	50 g/l Hexythiazox	EC
4	Mifexol [®]	240 g/l Spiromesifen	SC
5	Florion [®]	500 g/l Clofentezine	SC
6	Fenorya [®]	800 g/l Paraffinic oil	EC
7	Xalyron [®]	110 Etoxazole	SC
8	Aerynor [®]	240 g/l Spirodiclofen	SC
9	Jorenta [®]	228.6 g/l Spiromesifen + 11.4 g/l Abamectin	SC
10	Tebyron [®]	20% Tebufenpyrad	WP
11	Cynilox [®]	156 g/l Acequinocyl	SC
12	Abefin [®]	222 g/l Spirodiclofen + 18 g/l Abamectin	SC
13	Clefon [®]	185 g/l Spirodiclofen + 15 g/l Abamectin	SC
14	Eryntal [®]	50 g/l Etofenprox	EC
15	Fenpor [®]	50 g/l Fenpyroximate	SC
16	Ontaril [®]	9.3 g/l Milbemectin	EC

Product Advantages:

- Effectively controls mites and ticks that damage crops.
- Prevents the spread of mite-borne diseases, protecting plant and animal health.
- Improves crop yield and quality by reducing pest-related stress.
- Supports integrated pest management by targeting specific harmful mites.
- Contributes to healthier, more productive farming environments.

HERBICIDES

Herbicides (Weed Control Products)

Herbicides are plant protection products used to control unwanted weeds in agricultural fields. Weeds compete with crops for water, nutrients, and sunlight, inhibiting growth and reducing yields. Effective weed management is critical to achieving a healthy and productive harvest.

Featured Herbicides

	Brand Name	Active Substance	Formula
1	Tribonix®	75% Tribenuron-methyl	WG
2	Gluphinite®	200 g/l Glufosinate-ammonium	SL
3	Cyrenix®	240 g/l Clethodim	EC
4	Nythorin®	600 g/l Aclonifen	SC
5	Faloryn®	150 g/l Fluazifop-p-butyl	EC
6	Deryon®	330 g/l Pendimethalin	EC
7	Mefolyn®	30 g/l Mesosulfuron methyl + 90 g/l Mefenpyr-diethyl (safener)	OD
8	Rimatrix®	25% Rimsulfuron	WG
9	Zamorin®	50% Propyzamide	WP
10	Zimetra®	70% Metribuzin	WP
11	Dimstrike®	116.2 g/l Clethodim	EC
12	Kelvoryn®	100 g/l Clopyralid	SL
13	Cybutrain®	200 g/l Cyhalofop-butyl	EC
14	Iloryx®	240 g/l Isoxaflutole + 240 g/l Cyprosulfamide (safener)	SC
15	Helynor®	240 g/l Oxyfluorfen	EC
16	Dralynor®	250 g/l Flurochloridone	EC
17	Lumiren®	40 g/l Imazamox	SL
18	Sulvitron®	40 g/l Nicosulfuron	SC
19	Etyros®	452.42 g/l 2,4-D 2-Ethylhexyl ester + 6.25 g/l Florasulam	SE
20	Glyseta®	480 g/l Glyphosate Isopropylamine salt	SL
21	Quzarin®	50 g/l Quizalofop-p-ethyl	EC
22	Norvixyl®	75 g/l Mesotrione + 30 g/l Nicosulfuron	SC
23	Metacoril®	915 g/l Metalachlor + 45 g/l Benoxacor (safener)	EC

DESICCANT PLANT GROWTH REGULATORS NEMATICIDES

Desiccants

Desiccants are products used to facilitate rapid and efficient drying of crops. Typically applied pre-harvest, they help crops lose moisture quickly, improving storage life, optimizing harvest timing, and increasing efficiency.

Agrimax's desiccant portfolio ensures that crops dry quickly and efficiently, allowing farmers to manage their time and resources more effectively.

Plant Growth Regulators (PGR)

Plant growth regulators are chemicals used to regulate and direct plant development and productivity. These products can increase growth rates, improve flowering and fruit set, and enhance plant resistance to environmental stresses.

Agrimax offers PGR solutions that support healthy plant growth and increase productivity. Our products provide flexible formulations suitable for various agricultural conditions, helping farmers achieve efficient production.

NEMATOCIDES

Nematicides are microscopic pests that live in plant roots and can cause significant yield losses in agriculture. Effective nematode control is crucial for maintaining soil health and supporting plant development for productive farming.

Agrimax has developed nematicides that provide effective solutions for controlling soil-borne pests. These products help maintain healthy soil while supporting more productive plant growth.

Featured Nematicides

	Brand Name	Active Substance	Formula
1	Fosamir®	400 g/l Fenamiphos	EC
2	Fosraze®	%10 Fosthiazate	GR

Featured Desiccants

	Brand Name	Active Substance	Formula
1	Fentoryl®	240 g/l Carfentrazone-ethyl	EC
2	Carzurin®	200 g/l Carfentrazone-ethyl + 30 g/l Diuron	SE

Featured Plant Growth Regulators

	Brand Name	Active Substance	Formula
1	Gibralite®	% 40 Gibberellic acid (GA3)	SG
2	EthaCyl®	480 g/l Ethephon + 60 g/l Cyclanilide	SC
3	Unarix®	480 g/l Ethephon	SL
4	Gibranor®	20 g/l Gibberellic acid	SL
5	Garmith®	1 g/tb Gibberellic Acid	ST
6	Gibberion®	10 g/l Gibberellin A4/A7	SL
