

## **Environmental Geologist, Austin, Texas**

### **Job Summary**

Epperson Environmental Group is actively seeking an Environmental Geologist in Austin, Texas. We work with our clients to help resolve their most demanding environmental and human health issues in order to reduce or eliminate environmental liabilities. We do this by bringing clarity to both scientific and business related issues.

### **Key Responsibilities**

- Direct and assist with the design, implementation, and management of field investigations including air, soil, soil vapor, surface water, sediment and groundwater sampling programs;
- Conduct and manage environmental site assessments of commercial and industrial properties in conjunction with real estate transactions or mergers & acquisitions, with special emphasis on sites with complex contamination issues;
- Preparation of remedial cost estimates for potential and known environmental liabilities under a variety of regulatory frameworks;
- Direct and assist with remediation system design, installation, and/or operations and maintenance monitoring;
- Evaluate data and complete written proposals, cost estimates, and technical reports.

### **Minimum Requirements**

- Bachelor's Degree in Geology
- 7+ years full time work experience in performing soil sampling/remediation, site assessments, geological field work, and ground water investigation/remediation
- Strong analytical skills and excellent oral and written communication skills
- Completion of the OSHA 40-hour H&S training course
- Successful project management and execution completing projects on time, within budget, and achieving positive client satisfaction
- Collaborate closely with technical teams and other offices of the firm, listen to the client's needs, and develop solutions to meet their needs

- Create and manage diverse project teams, keep them on track, and drive projects to completion
- Position requires that the candidate must be able to travel

### **Preferred Qualifications**

- Licensed Texas Professional Geoscientist
- 12+ years full time work experience in performing soil sampling/remediation, site assessments, geological field work, and ground water investigation/remediation
- Existing, mature and tested client relationships and an ability to successfully market and win work

### **What We Offer**
