To whom it may concern,

I am writing in support of the Health First Indiana Funding. Thanks to this funding United Way Greater Cincinnati Southeast Indiana, in partnership with the Dearborn County Health Department was able to explore and work to implement a data referral system into our local community. This referral system will connect clients to agencies and allow the agencies to follow up with the client who is in need of services. As this system progresses, we will be able to track what clients are accepting services and those declining them along with how the services are making an impact in their lives.

Heath First Indiana was the funding to help jump start the beginning phases of this program and we look forward to the impact it will have and how it will grow to support our most vulnerable populations.

Thank you.

Sincerely,

A handwritten signature in black ink that reads "Karen Snyder".
