Capability Statement

Established in 2014, Privateer IT, LLC strives to provide the highest level of service in project management, infrastructure, governance, consulting, and analysis of information & communication technologies to our federal clients. Our CEO, Jerry Bennett, founded Privateer IT with the simple motto "Do what you say you're gonna do!". To that end, Privateer's goal is to provide innovative and transformative solutions to federal clients in the areas of SaaS & PaaS development, cloud environment & migration, infrastructure support, digital transformation center implementation, and data & application migration. Our continued success in this effort is driven by our dedication to innovation and understanding our customer's needs. We are committed to working with our customer to provide the right solution which reduces overall risk and increases quality.
