## Farm Setup Section

All configuration programs in the Farm Setup section perform very similar. They are used to customize and configure CattleWorks to your individual herd and farm specifications. The four sections that can be configured are: 1) Farm 2) Location 3) Breed 4) Event.

CATTLE WORKS		CattleWorks				
		"Keeping track" is our business				
<b>Herd Summary</b>						
Location	Cows	Bulls	Heifers	Steers	Calves	Total
Lot1	0	0	4	2	0	6
Weaned	0	0	7	3	0	10
Flats	8	0	0	0	0	8
LotAA	33	1	0	0	16	50
Barn	0	0	0	1	0	1
Pasture1	28	2	0	0	22	52
-----	-----	-----	-----	-----	-----	-----
<b>Total Cattle</b>	<b>69</b>	<b>3</b>	<b>11</b>	<b>6</b>	<b>38</b>	<b>127</b>

### 3.1 Farm Configuration

The Farm Configuration program allows you to enter information relevant to your own farm. This is used for personalizing your reports and screens. The information on this table will automatically be available elsewhere in the program. None of this information is required for the program to operate correctly; it is only used for displays and reports.

### 3.2 Location Configuration

The Location configuration allows you to add, delete and/or name additional "Locations" on your farm. (A Location is an area that your cattle are at; this can be a pasture, lot, pen, etc..) The information on this table will automatically be available elsewhere in the program. You can have an unlimited number of Locations or only one. However, you must have at least one pasture for the program to work properly.

**CattleWorks - Location Configuration**

#### Location Configuration

Location Name	Location Description
Flats	Pasture in the flats
▶ LotAA	LotAA
Pasture1	Pasture One
Barn	Pasture next to White Barn
New	Temp Pasture for new calves
Lot1	Pasture behind the house
Died	Temp location for dead cattle

**Location Name**

**Location Description**

### 3.3 Breed Configuration

The Breed configuration allows you to add, delete and/or name additional breeds for your herd. These do not have to be "proper" breeds but can also be any mixture desired. The program comes preloaded with a few standard breeds, however it is up to the individual user as to what and how many different breeds they want to maintain. The information on this table will automatically be available elsewhere in the program. You can have an unlimited number of breeds or only one. However, you must have at least one breed for the program to work properly.

**CattleWorks - Breed Configuration**

#### Breed Configuration

BreedName	BreedDesc
▶ Angus	Angus Breed
Hereford	Hereford Breed

**Breed Name**

**Breed Description**

### 3.4 Event Configuration

The Event configuration allows you to add, delete and/or name additional events for your herd. An event is anything significant that is associated or performed on a particular animal. Events are created by users of the system and can include but are not limited to such things as vet visits, vaccinations, doctoring, de-worming, de-horning, castration, etc. The program comes preloaded with some events, however it is up to the individual user as to what and how many different events they want to maintain. The information on this table will automatically be available elsewhere in the program. You can have an unlimited number of events or only one.

**CattleWorks - Event Configuration**

### Event Configuration

Event Name	Event Description
▶ Pinkey Shot	Shot for PinkEye
Ivomec	Pour on Ivomec
BlackLeg Vac	Vaccine for black leg
Vet Visit	Visit by vet.
Grain	Mill ground corn
Exposed to Bull	Exposed to Bull

**Event Name**

**Event Description**
