OXISRESEARCH™

AOXRE OxisResearch™ is designed to provide a quick and convenient tool for the measurement of oxidative stress in humans and animals, through the measurement of markers such as protein, enzyme, lipid and DNA.

BENEFITS OF OUR KITS

- Provides reference information on human health status.
- Improves livestock's productivity and product quality.
- Study of oxidative mechanisms in bio specimens to provide clues for curing the diseases caused by oxidative stress.

DISEASES OFTEN ASSOCIATED WITH OXIDATIVE STRESS:

ADHD, Cancer, Parkinson's disease, Lafora disease, Alzheimer's disease, Atherosclerosis, Heart Failure, Myocardial Infarction, Fragile X Syndrome, Sickle cell Disease, Lichen planus, Vitiligo, Autism, Infection, Chronic fatigue syndrome and Depression.

OxisResearch™ Oxidation Stress Marker Assays

Oxidative stress reflects an imbalance between the systemic manifestation of reactive oxygen species and a biological system's ability to readily detoxify the reactive intermediates or to repair the resulting damage.
