

# CWD HK Expertise – Modular Repair and Testing

CWD-HK has developed technical expertise over the last 20 years in mobile phone re-manufacturing. These capabilities enable deep level repair, at the modular level and re-assembly and quality testing to OEM equivalent quality standards.

# CWD HK Expertise - NPI and Quality Checks

All new models introduced go through a dedicated New Product Introduction (NPI Process)

- Rigorous testing to validate product quality and repair process integrity.
- Standard Operating Procedures are developed, and training and qualification processes are followed.
- Tools and jigs are designed and custom created or sourced directly from the OEM.
- Processes are developed for reclaim and re-conditioning at the modular level.
- Final product is qualified through Accelerated Life Testing (ALT), 100% quality controlled at End of Line, and quality maintained through ongoing sampling and in line quality tracking.
