

Quick! Homemade/Handmade Diapers Made from t-shirts

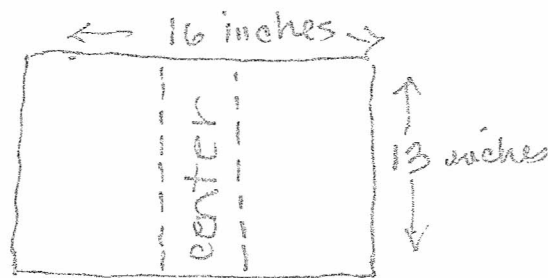

Prefolded Rectangular Diapers

Finished measurements are 13x16 inches for newborn
Each diaper will have several layers where needed most

Lay t-shirt out flat

Make two cuts 13 inches apart, starting at the bottom, cutting off the hem.
Make one cut up the top layer, in the center

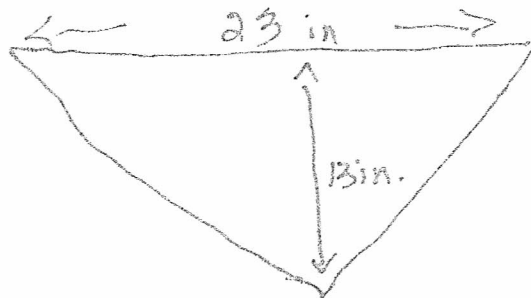

Fold the sides in until you have layers in the center and the diaper is 16 inches x 13 inches. You will want to have at least three layers that are 4 x 13 inches. Cut off what you do not need and discard. Zig-zag along the layers and around the outside of the diaper and it is finished. Attach with large safety pins* as though it were on a baby.

Prefolded Triangular Diapers

Finished measurements are 23 inches along the top and 13 inches from the center of the back to the tip of the triangle.

Make three layers from t-shirts. Zig-zag together along all out side edges and from the center back to the tip of the triangle. Attach with a large safety pin* as though it were on a baby.

* I got my pins at Hobby Lobby in the fabric department
