

Using a scant 1/4" seam allowance and the chart above for placement sew your pieces together to make your block. Start at the top and work your way down.

When you get to the roof pieces (I and D's) take the 2 D squares and draw a line from point to point with a light colored pencil.

This is going to be your sewing line to make the slant on the roof piece. Line up one of these squares on each end of the (I) piece of the roof and sew on the line making sure you have it placed it on the right direction (see chart!) Then trim the excess off 1/4" from where you sewed on that line and press. Repeat with the other side.

Next sew on the roof extension E. (Just under the roof section) now, sew on one of the (F) sections under that. Then set this aside for a bit!

Sew the upstairs (J's) and (K's) together using the chart for your guide and then sew the remaining (F) piece under them and then sew to the roof section to that roof piece you laid aside.

For the bottom windows and door...sew the 2 of the (K's) and a (J) together and then sew 2 of the (G's) one on the top, and one on the bottom of the window section. Repeat this procedure for the remaining (J)(K's) and (G's). You now should have 2 window sections. Take your door piece (H) and sew to one window section and then sew to the remaining window section.

Sew both upper sections and lower sections together and press. Your block should now measure 14 1/2" unfinished.
