(elbow)

Glass Shield

Congratulations! You have found the best vaporizer system!

THeCan is the best and the easiest to use.

- I. Connect the power cord to THeCan and plug in.
- 2. Use a grinder to fine grind your favorite herbs.
- 3. Load your grinded herbs into the frosted end of the glass Whip (load it full but not too tight).
- 4. Carefully insert the frosted glass end of the Whip into THeCan, just above the control knob. Secure the Whip using the Whip Clip.
- 5. Turn on the power by turning the control knob to the right past the click. All the way to the left is HIGH. Turn to the right (clockwise) to lower heat setting.
- **6.** Preheat for 5 10 minutes. **Caution**: element and glass will become very hot.
- 7. Take slow, even draws. ENIOY!
- 8. Do not leave the Glass Whip in and turn the unit off. If you do, turn THeCan on and wait until fully heated before

removing the **Glass**Whip to clean and reload. You may break a cold Whip!

Note: Do not exhale or blow into the Whip. If herbs fall back into the heating element, remove the Whip and tap while THeCan is upside down.

Keep the screen clean for best performance. Use the Whip Clip to remove and replace the screen.
