

Mobile Equipment
Automatic Grease System

Genuine Optimized Lubricant Delivery

Solution Summary:

Part No.	GKMOBXXBRNDMODL
Availability	3 Weeks
Typical Install Time	1-4 Days
Number of Lube Points	Varies
Lubrication Intervals	Timer Controlled (Adjustable by Client)
Recommended Lubes	JAX MP 700-2
Power Requirements	24 VDC
Air Requirements	None
Recommended Maintenance	Refill reservoir weekly Inspect output periodically

Recover daily lubrication time as productivity and ensure maximum longevity of pins and lubricated components.

GOLD has grease lubrication practices and dispensing equipment which:

1. Dramatically increase pin life
2. Reduces lubrication labor
3. Improves overall lubrication
4. Reduces ingress of dirt and moisture
5. Reduces lubricant consumption
6. Reduces operational costs

Kit includes: Logic control master pump w/indication light, mounting bracket, divider blocks, tubing and fittings. Lubricant transfer pump for 120lb keg supply (optional equipment).
