

Fresh Air -Plant Based Odor Eliminator

Restore Freshness Everywhere

FRESH AIR - PLANT BASED ODOR ELIMINATOR

Fresh Air is plant-based technology designed to eliminate bad odor on contact, leaving your space fresh and clean. Unlike traditional air fresheners that mask unpleasant smells, Fresh Air uses advanced, plant based active ingredients to eliminate odors at their source, creating a blank canvas for the scents you love. This cutting-edge formula has been tested by third-party labs such as UL (Underwriters Laboratories), SGS, and other industry leaders, demonstrating superior performance in eliminating bad odors compared to other products. Ideal for homes, cars, and any environment, Fresh Air delivers a natural, sustainable solution that enhances your scent experience without relying on harmful or ineffective chemicals. It can be used in skin, hair, sprays, foggers, laundry, all purpose cleaners, candles and diffusers. Experience a new level of freshness with Fresh Air—the choice for cleaner air.

EFFECTIVE

FRESH AIR

Restore Freshness Everywhere

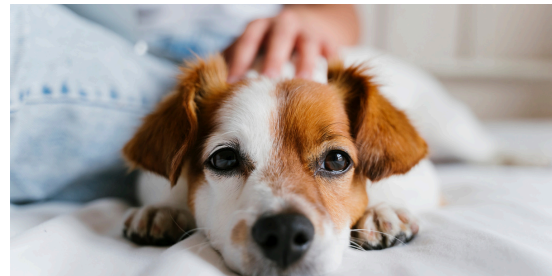

Superior

Fresh Air has been tested by Underwriters Laboratories (UL) against cigarette smoke and was rated significantly better than the leading brand.

Eliminates Odor

Testing conducted by SGS shows Fresh Air eliminates trimethylamine, commonly found in pet urine odors. Fresh Air works by eliminating bad odors at the source, leaving behind truly fresh, clean air.

Works on contact

Fresh Air works on contact, delivering fast and permanent odor elimination. Other products may try to mask bad odors with heavy fragrances—often creating an unpleasant mix of smells. Fresh Air eliminates odor, creating a clean slate, allowing your preferred scents to shine.

Plant Based

We're creating technology to bring advanced, effective solutions for eliminating odor. By using sustainable, renewable ingredients, we're creating products that are effective and safe for your home, family, and the planet.
