

We Fix the System. Not Just the Projects.

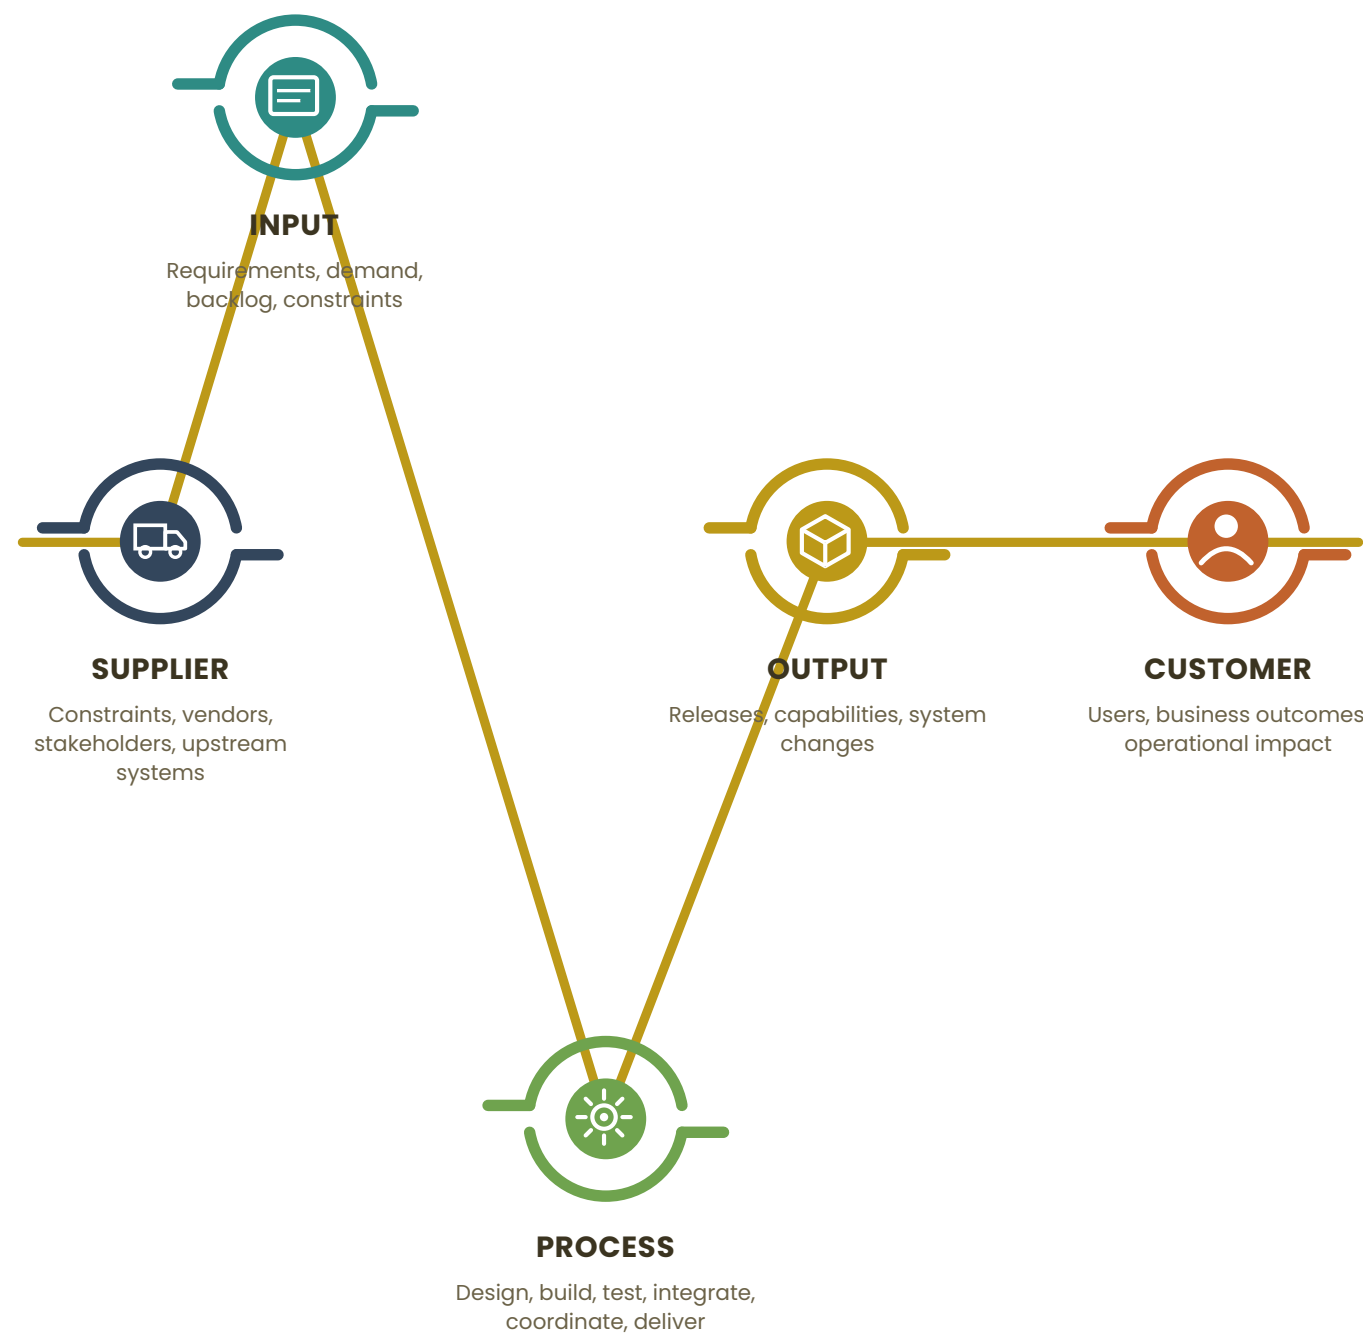

SIPOC Industries helps organizations restore predictable execution by diagnosing and correcting breakdowns across the entire delivery system.

SiPulse, the SIPOC Industries Diagnostic Model

A SYSTEMS LENS FOR DELIVERY EXCELLENCE

Most organizations ignore delivery issues, or treat them like minor cuts and scrapes — a bandage here, a quick fix there. But these aren't small wounds. They're symptoms of a struggling delivery system — and treating the symptom instead of the system is exactly why the same problems keep coming back. SiPulse is the diagnostic that looks underneath the symptom. Using the SIPOC lens — Supplier, Input, Process, Output, Customer — it traces exactly where the system is breaking down, not just where the breakdown became visible.

ACME MANUFACTURING CO.

System Health Check

Illustrative example — your assessment will reflect your own system

1 = Poor · 2 = Below Average · 3 = Average · 4 = Above Average · 5 = Very Good

Outcomes Delivered	12345
Cross-Functional Communication	12345
Accountability Clarity	12345
Risk Tolerance Alignment	12345

+ additional dimensions specific to your organization

TOP 3 ISSUES TO SOLVE FIRST

- 1 Cross-functional handoffs lack a single point of accountability
- 2 Inconsistent risk tolerance across teams delays key decisions
- 3 Limited shared visibility into work-in-progress across functions

The result isn't a diagnosis for its own sake — it's a prioritized, evidence-based starting point. You walk away with a clear picture of what's actually broken, a system health score across the dimensions that matter most, and the foundation SiCycle builds the recovery plan on.

Let's start your SiPulse™ today.
