

# Peel & Stick Swappable™ Patch

NO IRON • NO SEWING • NO TOOLS

## ONE PATCH. EVERY TEAM.

Designed for multi-team families and fans. Apply once to a jacket, vest, or bag, then swap patches anytime teams or seasons change.

### IMPORTANT: Velcro® Hold

**Hold the base firmly against the item when removing patches.**

The Velcro® connection is very strong. Holding the base helps prevent the adhesive from lifting off the fabric.

#### Preparation

-  For best results, apply to clean, dry fabric
-  Avoid smooth, slick, non-textured materials or areas that bend and flex often, as adhesion may not hold

#### How to Apply

- 1 Hold patch in place to preview placement
- 2 Peel backing off base
- 3 Lightly place and adjust as needed (do not press yet)
- 4 Once aligned, press firmly to secure
- 5 Press edges well for best hold

**Use your patch on more than one item.**

Add a base to other items to swap anytime.

Extra adhesive bases are available online.

# Peel & Stick Instructions

CONTINUED

## Extra Hold Tips

Once secured to the item, carefully remove the patch from the base (*hold the base firmly while removing the patch*).

**Warm the applied base** with a hair dryer for **15–20 seconds**, then press firmly, especially around the edges.

**DO NOT IRON.** High heat can weaken the adhesive, causing the patch to shift or lose hold. If this happens, a new adhesive backing may be needed to reattach it.

## Washing Instructions

- 1 Wait **24–48** hours before the first wash
- 2 Remove the patch from the base before washing
- 3 When removing the patch, **hold the base** to prevent it from lifting
- 4 Turn garment inside out
- 5 Wash on cold or warm (never hot)
- 6 Tumble dry **low** or air dry
- 7 **DO NOT DRY CLEAN**

Slight edge tackiness is normal and does not affect performance. If the base edge collects lint over time, remove with tape or a lint roller. (Do not use liquids or cleaners.)
