Profile

My career in television began in 2006, having left Middlesex University with a BA (Hons) degree in Television Production. After working for 3 years at London facilities company, Electra and learning all aspects of camera equipment, I spread my wings and entered into the freelance world, forming TV Camera Limited and working as a Camera Assistant & Jimmy Jib / Hothead technician. More recently my career has taken the natural progression into camera and crane operating on numerous productions.

Experience

Over the past few years, I have been fortunate enough to have worked on some of the world's biggest television jobs. From live Outside Broadcasts such as the 2012 Olympic Opening Ceremony and the Rio Olympics to music gigs such as Glastonbury and the Rolling Stones in Hyde Park. From commercials and promos such as the new Jaguar XF launch to Light Entertainment studio shows and events including Jonathan Ross and the Brit Awards. I also have a vast amount of experience travelling across the globe with equipment and working in various, sometimes difficult locations, having worked on Top Gear and Amazon Prime's The Grand Tour.
