

Major Minerals

Total Feeds minerals contain only the most bioavailable major minerals calcium, phosphorus and magnesium.

Trace Minerals

Only the most bioavailable trace minerals are used to make Total Feeds minerals. Copper, Manganese and zinc are a combination of amino acid chelates and chloride form. Selenium is all from organic sources.

Ascophyllum nodosum

Total Feeds minerals all contain Ascophyllum nodosum; which is documented by research to provide many of the benefits listed on the front of this brochure.
