Total Feeds®

A new non-prescription, all-natural dog supplement that can effectively replace both Glucosamine and Chondroitin.

Developed by a Canadian biotech company committed to creating optimal health in animals, this once-a-day natural canine supplement is designed to give older dogs back their zest for life, enabling greater mobility, supporting a strong appetite, and helping to maintain a thick, healthy coat. With naturally sourced ingredients, **Canine15 NATURAL** supports the complete comfort and safety of dogs by giving them relief from joint tenderness so they regain their mobility, confidence and pet-personality.

SAFE AND EFFECTIVE

Canine15 NATURAL contains only two ingredients, Sulfur and Lignosulfonate. These same two natural ingredients are found in many food and feed products and approved for use by both Canadian and US health authorities.

EASY

Canine15 NATURAL is easy to administer in food or directly in the mouth as dogs do like the taste. Only one time per day in capsule form, no measuring, no messy compound to apply.

POWERFUL

Canine15 NATURAL is stable and fast acting; in as early as 5 days your pet owners will notice a change. Within 10 days, owners will be surprised at their dog's improved mobility and appetite.

COST EFFECTIVE

The low cost of pain control is attractive to dog owners at a cost of approximately \$1.10 per day.

Features:

- Natural
- Antiviral
