Hair Fairy Godmother
Head Lice Rescue
Granting Your Wishes
By Removing Your Itches

After Care Instructions

1. Change Shirt Immediately after Treatment.
2. Leave oil treatment in hair for 1 Hour. Wash hair treatment out with shampoo and a quarter size amount of Dawn dish soap. Scrub scalp thoroughly and condition as normal.
3. Comb wet hair daily for 7 days. Start with tape of neck and an inch of hair. Work your way to the top of your head an inch at a time. Comb and wipe on white paper towel. It is normal to find debris such as nymphs (baby lice) or nit castings. This will be explained to you during treatment.
4. For severe infestations we recommend an olive oil treatment on day 3 for one hour with shower cap. Shampoo and add quarter size amount of dawn dish soap when shampooing out. Condition as normal. Continue combing through day 7.

Environmental Cleaning

1. Dry bedding on high heat for 1 hour. No need to wash bedding unless soiled. You can wash bedding in cold water.
2. Vacuum flooring if treatment was for young children
3. Cleaning brushes and hair ties- Either freeze in Ziplock Gallon bag over night or put in bowl and pour boiling water and let objects sit until water is cold or just purchase new hair accessories.
4. Bag anything that cannot be put in the dryer such as stuffed animals with batteries. If it can be put in dryer, just dry on high heat for an hour. Examples… anything used within the last 48 hours such as stuffed animals, back packs, etc.
5. Make sure to use clean towel going forward after treatment.

Comb Care

Your technician will leave a professional nit comb to be used within the family. Just sanitize between family members. Do not boil as this will cause comb damage. Clean with warm water and soap. Additional combs are available for purchase.
