DANLIN ENGINEERS COMPANY PROFILE

VISION

To be a leading engineering firm recognized globally for delivering innovative and sustainable solutions, fostering continuous growth and development for our employee, vendors and clients, and driving progress to improve lives.

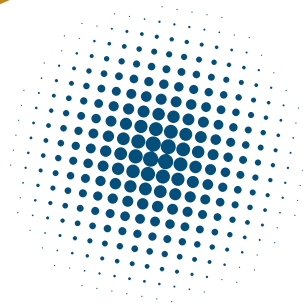

MISSION

To provide exceptional engineering services through innovative design, quality craftsmanship, and a commitment to customer satisfaction. We aim to foster a collaborative and inclusive work environment and offer long-term support to enhance the skills and knowledge of our team, ensuring their growth and success in the engineering field.

VALUES

Integrity
Innovation
Excellence
Collaboration
Long-term Support
Customer Commitment

Area of Expertise

Offshore
FPSO

Onshore
REFINERY

Marine
SHIPYARD

Offshore
FIXED PLATFORM

Onshore
PETROCHEMICAL

Our Business

ENGINEERING CONSULTING SERVICES

Danlin Engineers excels in offering detailed and reliable engineering consultancy across multiple domains for Oil and Gas, Power energy, and Smart infrastructure.

PROJECT MANAGEMENT

Danlin Engineers ensures efficient and timely project delivery by employing world-class project management practices.

MANPOWER SUPPLY

Danlin Engineers provides highly skilled manpower to address the growing demands of technical and industrial projects.

www.danlin.in

Process Engineering

- **Focus:** Developing PFDs & P&IDs for facilities, sizing & Water hammer analysis.
- **Software:** Smart Plant P&ID, PIPENET for surge analysis.

Piping Engineering

- **Focus:** Piping layout, material selection, stress analysis, and flow management.
- **Software:** CAESAR II for stress analysis, PDMS, S3D, E3D for 3D Modelling and AutoCAD for Drafting.

Civil & Structural Engineering

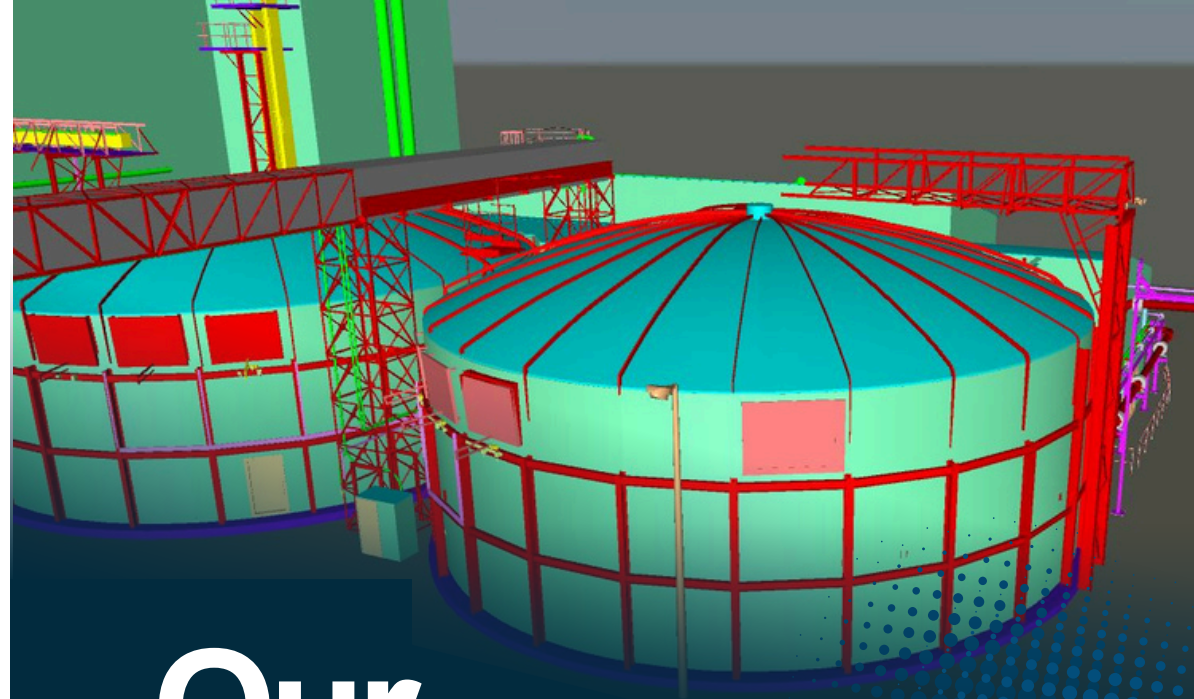

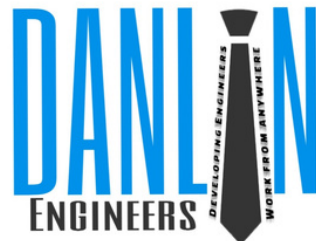

- **Focus:** Site development, foundation design, structural analysis and support for structures and pipelines.
- **Software:** STAAD Pro & SACS for structural analysis, Revit for buildings and infrastructure & Tekla for structural modeling,

Mechanical Engineering

- **Focus:** Mechanical equipment design and Finite Element Analysis, including Tanks, and static equipments.
- **Software:** PV Elite, Ansys for 3D mechanical design and analysis.

Electrical Engineering

- **Focus:** Designing power distribution systems, lighting, and control systems.
- **Software:** ETAP for electrical power systems analysis, and AutoCAD Electrical for drafting.

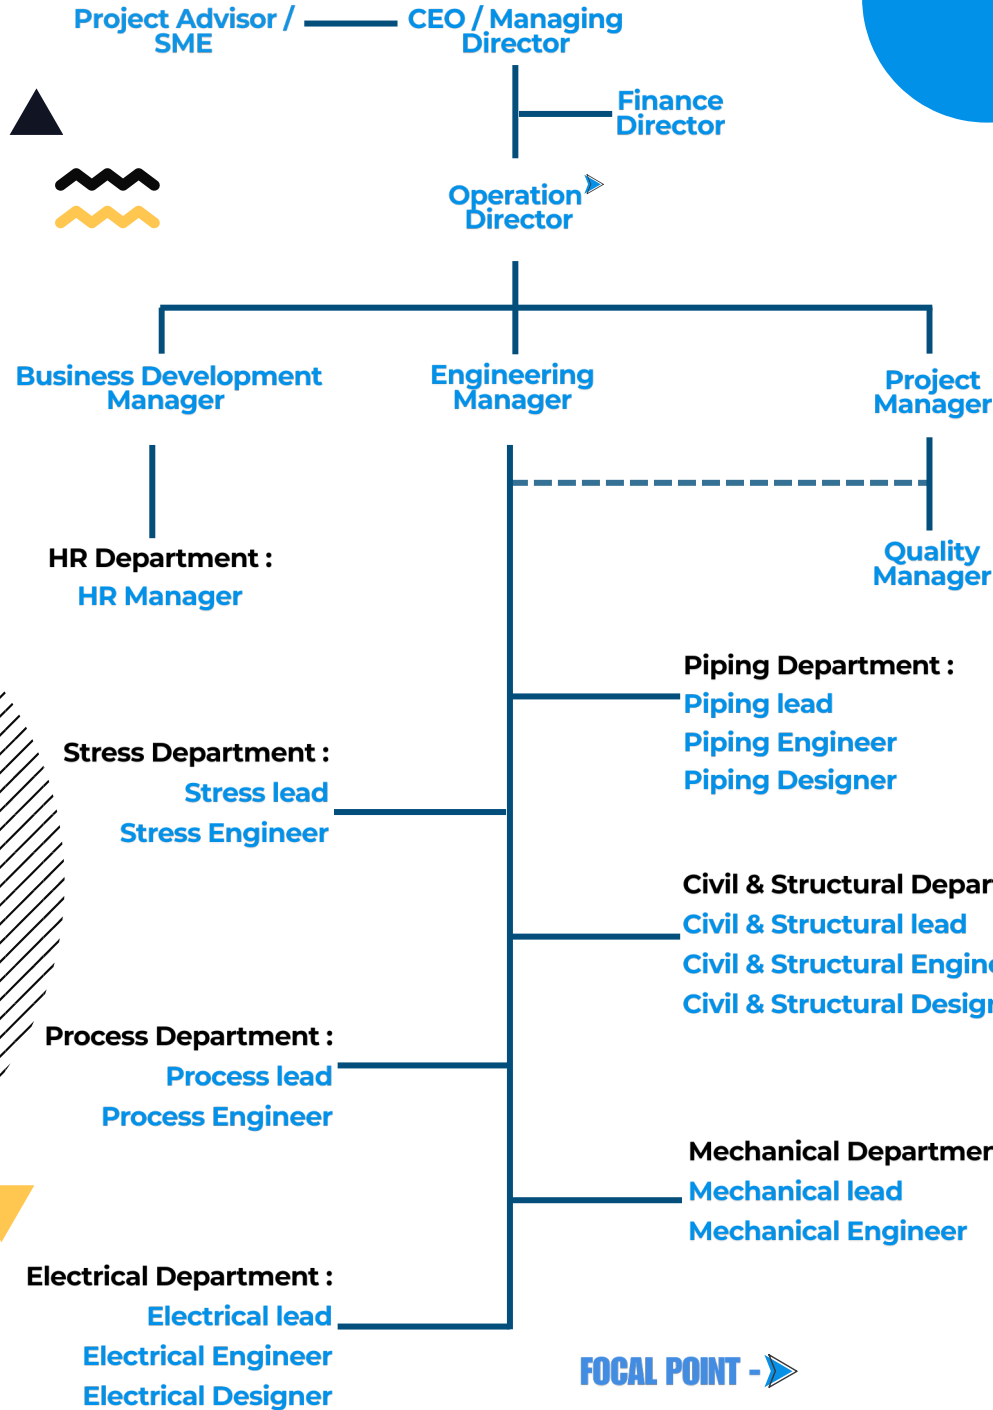

Our Value added Services

INNOVATIVE SOLUTIONS SUPPORT CRITICAL QUALITY REQUIREMENTS & CREATE RELIABLE PROJECT SUCCESS ...

DANLIN Engineers Creating the new horizons for Digital Era

From start to finish, we help to get the job done!

Value Proposition & Customer Challenges

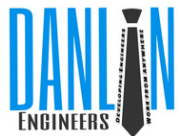

- **Client Challenges :** Complexities in engineering design execution.
- **Value Offered :** Advanced engineering solutions and Expertise in Piping, Civil, Structural, Electrical, Instrumentation, and Mechanical disciplines; use of advanced analysis & drafting software.
- **Client Challenges :** Project delays, and high operational costs.
- **Value Offered :** Structured project management with risk mitigation strategies
- **Client Challenges :** Difficulty in Hiring Quality Engineering Talent, Shortage of Skilled Engineers & Workforce Training
- **Value Offered :** Providing qualified, pre-trained & job-ready engineers.

Target Industries

- Oil & Gas, Power, Renewable Energy, Smart Infrastructure, and Industrial sectors.

Future Vision :

Expansion into AI-driven engineering solutions and digital transformation in project execution.
