

# Virtually Perfect Accounting

Sharp numbers. Sunny outlook.

Clean books. Clear numbers. Real peace of mind.

## ABOUT US

### Bookkeeping with a sunny outlook

---

Running a business is hard enough — your books shouldn't add to the stress. At Virtually Perfect Accounting, we take the numbers off your plate so you can get back to doing what you love. We pair meticulous, on-time bookkeeping with genuinely warm, personal support — and we handle it all virtually, wherever your business happens to be.

Think of us as the calm, organized partner in your corner: the one who keeps your records clean, your reports clear, and your mind at ease all year long — not just at tax time.

## OUR STORY

### Built on real relationships, not just spreadsheets

---

Virtually Perfect Accounting was founded by Tori, who spent 8 years helping small businesses make sense of their finances and saw the same thing again and again: talented owners buried in receipts, second-guessing their numbers, and dreading the words “month-end.” There had to be a better, friendlier way.

So we built one. A modern, fully paperless practice that combines accounting expertise with the kind of responsive, human service that big firms forget about. Based in Florida and serving clients everywhere, we're small enough to know your name and your business — and sharp enough to keep your books virtually perfect.
