Law of Attraction.....	42
Law of Cause and Effect.....	42
Redemption of the human soul.....	42
Development of the human soul.....	42
Conclusion.....	42
Human Will principles:.....	42
Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that oppose human will principles including:.....	43
<b>Human Desire Principles.....</b>	<b>44</b>
Summary.....	44
Definition (What the principles are).....	44
Objectives (Why the principles are applied to law).....	44
Application (The creation and laws affected).....	44
Reveals (What the principles reveal about God).....	45

Examples (The principles' applications in law).....	45
Gravity & aerodynamics.....	45
Law of Attraction.....	45
Human hunger.....	45
Redemption of the human soul.....	45
Transformation of the human soul.....	45
Conclusion.....	46
Human Desire principles:.....	46
Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that oppose human desire principles including:.....	46
<b>Human Redemption Principles.....</b>	<b>47</b>
Summary.....	47
Definition (What the principles are).....	47
Objectives (Why the principles are applied to law).....	47
Application (The creation and laws affected).....	47
Reveals (What the principles reveal about God).....	48
Examples (The principles' applications in law).....	48
Gravity & Aerodynamics.....	48
Law of Compensation.....	48
Redemption of the perfect natural human.....	48
Development of relationship with God.....	48
Conclusion.....	49
Human Redemption principles:.....	49
Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that oppose human redemption principles including:.....	49
<b>Human Transformation Principles.....</b>	<b>50</b>
Summary.....	50
Definition (What the principles are).....	50
Objectives (Why the principles are applied to law).....	50
Application (The creation and laws affected).....	50
Reveals (What the principles reveal about God).....	51
Examples (The principles' applications in law).....	51
Prayer.....	51
Reception of God's Love.....	51
The unaware soul.....	51
Soul union condition.....	52
Conclusion.....	52
Human Transformation principles:.....	52
Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that oppose human transformation principles including:.....	52

# Glossary

**Compensation principles:** are will-based, and will be discussed in relation to self-aware beings with free will. The human soul (not the body or spirit body) is a self-aware being with the ability to express free will depending on development and as such is the highest creation.

**Compensation:** is the reward provided to the soul and its environment for self-responsibility (the obedience to God's Principles), or the corrective penalty enforced upon the soul and its environment for the disobedience to God's.

**Creation:** includes any matter or creature from the smallest particle to the most complex living creation of the human soul.

**Components:** are creations of less complexity combined in new ways Any lower creation is a potential component for a higher creation.

**Development:** increases in quality and capacity as the human soul lives in more harmony with God's Principles, and decreases as the human soul lives in less harmony with God's Principles.

**Divine redemption:** occurs by desiring a personal relationship with God. It is the process of desiring and engaging God's Help to remove the effects of sin and the desire to sin from the soul. It recognizes that only God can remove all the effects of sin (since sin affects other creations) and asks God to help remove the cause of sin within the soul. Divine redemption is a God reliant process driven by desire that involves awakening to sin and becoming emotionally repentant towards God and all of God's Creations. **Forgiveness** is accomplished by God responding to the emotional repentant desire and God's Love enters the soul to remove the effects of sin existing in the soul, and the soul's desire to sin. During Divine redemption we receive God's Truth on all matters and the soul is prepared to eventually obtain immortality.

**Each creation's complexity:** is determined by the complexity of its individual components, energy and properties Each creation of higher complexity has higher energy capabilities If a creation has higher complexity and energy capabilities, it is also considered to be higher in hierarchy.

**Energy:** includes information, energy, emotion, thought, communication, relationship or interplay within or between creation.

**Scope:** determines the existence of the Universe, everything within the Universe, how everything communicates with all elements of the Universe, and also the inbuilt soul based mechanisms via which the highest creation within the Universe is able to communicate with God.

**External Rules:** means a set of laws and potentials created by creation combinations external to the individual creation itself that affect the creation's properties and energy.

**Free Will:** is the God given gift of the ability to be a self-aware being able to make self-responsible and self-generated decisions and choices, and able to have desires which come from self-awareness rather than instinct.

**Governance principles:** will be discussed in relation to self-aware beings with free will Other beings are controlled by Governance principles but the control is instinctual rather than will based The human soul (not the body or spirit body) is a self-aware being with the ability to express free will depending on development.

**Hierarchical universes:** can be constructed, each one governing and containing multiple universes of the lower hierarchical type.

**Hierarchy:** determines the position or place of each creation and law within the Universe, and the power and energy each creation or law has over other creations and laws lower in the hierarchy.

**Human Desire or Aspiration:** is the genuine expression of current soul based faith, can only occur in self-aware beings, is measured by its relative harmony with God's Principles, is expressed as an intended or aspired to soul based emotional state, motivates future will based decisions, choices and actions, and differs from instinctual need. Desire is driven by what the soul currently has faith in and determines what the soul desires in and for its future. If will and desire are in harmony change is not possible.

**Human redemption:** is the process of paying the penalty for and removing sin from the human soul in order to recover the human soul back to its created pristine condition. It is a will based self reliant process that involves the enforced painful experience and release of sin related emotion. **Forgiveness:** is accomplished through emotional "forgetfulness" of past sin and correction of the desire to sin.

**Inbuilt Rules:** means a set of laws and potentials built into the creation itself that govern the creation's properties and energy.

**Law:** is an individual set of laws or an individual rule set Each more complex creation has more complex inbuilt rules More complex inbuilt rules interact with more complex external rules and therefore create more complex laws.

**Nature:** is each individual human soul's God given personality, attributes, characteristics, qualities, individuality, and primary fields of interest.

**Physical universes:** are the lowest human based hierarchical universes and are the physical

and spiritual universes (complete with all spheres) able to be perceived through the senses of the physical and spiritual bodies.

**Power of Governance:** is the energy able to be expressed by the human soul which varies in quality and capacity in direct relationship to development.

**Properties:** include all properties, characteristics, attributes, attractions, and restrictions of the creation itself.

**Responsibility principles:** are will-based, and will be discussed in relation to self-aware beings with free will. The human soul (not the body or spirit body) is a self-aware being with the ability to express free will depending on development and as such is the highest creation.

**Role-Responsibility:** is the assignment of specific roles of governance in God's Universe dependent upon development, self-responsibility, and according to one's nature.

**Rule set:** is the combination and interaction of inbuilt and external rules.

**Self-Responsibility:** is the law based requirement of self-awareness, to seek truth, love and understanding of all principles of Love and law, and the loving ownership and expression of one's will, desire, passion, emotion, attitudes, intentions, thoughts and actions in harmony with God's Principles and laws.

**Sin:** is the existence of will or desire in disharmony with God's Principles whether the will or desire is acted upon or not.

**Soul universe:** is the current highest human based hierarchical universe. It can only be perceived by the soul senses of a soul in a self-aware state and also contains unaware souls ready to incarnate.  
the soul desires in and for its future. If will and desire are in harmony change is not possible.

**Transformation:** is the potentiality offered to the human soul with sincere and passionate desire to exceed its original created condition and potentials as a human, and to allow God's Personal Love to be absorbed by the soul in order to transform the soul into an immortal Divine creature with the potential of infinite expansion (but not infinite as God is). Transformation principles are the most complex of all of God's Principles.

**Will:** is the genuine personal expression of the gift of Free Will, is determined by the current soul based emotional condition, is developed by desire, is measured by its relative harmony with God's Principles, and drives the thoughts, beliefs, attitudes, actions, allowance of inspiration and response to memories of the individual. Will is driven by the soul's current condition and determines what the soul will automatically do in the current moment unless desire is engaged to progress or regress.

# FOUNDATION PRINCIPLES

## Love Principles

### Summary

Love principles envelop God's Love around each creation, principle and law ensuring:

- Love governs all principles
- Love is enforced, compelled and upheld
- All creation experiences God's Love in different degrees
- All creation demonstrates and facilitates the flow of God's principled love
- The human soul can enter a love based relationship with God

### Definition (What the principles are)

- The law shall be love and uphold love
- The law enforces and compels love
- The law demonstrates and facilitates the understanding of love
- The law is compassionate

### Objectives (Why the principles are applied to law)

- To ensure all creation experiences the expression of God's Love
- To ensure the human soul learns about the availability of God's Personal Love
- To ensure the survival of all creation collectively
- To ensure loving order in all creation

### Application (The creation and laws affected)

- Every law
- All matter living and non-living

### Reveals (What the principles reveal about God)

- God's great desire is for all of His creation to be loved
- God's Love is the highest governing principle of the Universe
- God feels Love is more important than all other things

## Examples (The principles' applications in law)

### **Gravity**

Lovingly promotes an environment that results in my being able to fearlessly express myself and enjoy my life.

### **Aerodynamics**

Gives me a possible experience which exceeds my gravity bound state resulting in enhanced joy and amazing wonder.

### **Law of Compensation**

Compensation lets me know when love has been upheld or compromised by my attitudes, emotions, thoughts or actions.

### **Law of Forgiveness**

Compassion is demonstrated to me if I am repentant by allowing forgiveness for unloving emotions, feelings, thoughts and actions taken, even when I cannot correct all of the effects of what I have done.

## Conclusion

### **Love principles:**

- Are impossible for humans to apply fully without receiving God's Love
- Ensure purposeful existence and happiness for all creation
- Are principles most frequently opposed and ignored by humans
- Are the principles we have been teaching

# Truth Principles

## Summary

Truth principles envelop God's Truth around each creation, principle and law ensuring:

- Truth is inseparably joined with Love as the highest of all principles
- Truth is enforced and compelled
- All creation lives within the framework of mathematical, scientific, spiritual and emotional fact
- Precision and certainty in the fabric and framework of creation

## Definition (What the principles are)

- The law shall be God's Truth
- The law shall expose God's Truth and uphold God's Truth
- The law is the spiritual, emotional, scientific and mathematical fact
- The law is the fabric and framework of creation
- The law enforces and compels truth

## Objectives (Why the principles are applied to law)

- To ensure all creation experiences God's Truth
- To ensure the human soul learns God's Truth
- To provide a fixed framework for the operation of Love
- To provide dependable and predictable law

## Application (The creation and laws affected)

- Every law
- All matter living and non-living

## Reveals (What the principles reveal about God)

- God's great desire is for all of His creation to be in harmony with Truth
- God's Truth is the framework for the expression of Love
- God feels Truth and Love are indivisible

## Examples (The principles' applications in law)

### **Gravity**

Is scientifically measurable and mathematically defined so that I can use the law with knowledge and certainty in my activities and life.

### **Aerodynamics**

The law defines the primary conditions for flight, and once understood, I can build a device which engages the facts in order to fly.

### **Physical properties of elements & substances**

All matter has individual characteristics and properties, and each element of the same kind will exhibit the same properties and react the same way under specific **circumstances**. **Each substance of the same kind exhibits the same "truth"**.

### **Law of Attraction**

Exposes to me the truth of my own condition by attracting circumstances and situations that expose the truth about my condition. Once I know my condition, I can see the causes for the events I attract.

### **Physical illness in the human bodies**

If I am ill, the truth principles in the Law of Compensation, the Law of Cause and Effect, and the Law of Attraction work together to expose that I am attempting to emotionally deny a truth about love (whether it be love of self, other half, others or the environment).

## Conclusion

### **Truth principles:**

- Are impossible for humans to understand without receiving God's Love
- Ensure existence, harmony and predictability for all creation
- Ensure fearlessness, security and safety for all creation
- Are principles most frequently opposed and ignored by humans
- Are the principles we have been teaching

# Life Principles

## Summary

Life principles transfer God's Life Force to each creation, principle and law ensuring:

- Life energy from God to be given to living creatures
- Life energy is transferred during pro-creation
- Life is promoted, nurtured, respected and sustained
- Imbalance is prevented and repaired
- Matter that "dies" is transformed to promote life

## Definition (What the principles are)

- The law shall allow God's Life Energy to enter creations
- The law shall promote, nurture, respect, and sustain life
- The law shall prevent and repair imbalance
- The law shall transform death to promote life
- The law shall allow for life to be given to creations

## Objectives (Why the principles are applied to law)

- To ensure creation, life, survival and balance
- To ensure matter will constantly change in order to support life
- To ensure survival before engagement of higher laws is enabled by ensuring that knowledge of the higher law is obtained before using the law
- To allow living creations to pro-create or replicate

## Application (The creation and laws affected)

- Every law
- All matter living and non-living

## Reveals (What the principles reveal about God)

- God loves life and created life
- God promotes, nurtures, respects, values and sustains life
- God feels that life is precious and sacred
- God wants us to know the higher laws before we use them

## Examples (The principles' applications in law)

### **Gravity**

Creates an atmosphere, and prevents creatures requiring that atmosphere from leaving the atmosphere due to physical centrifugal forces.

### **Aerodynamics**

Requires knowledge (instinctual or obtained by investigation) of the law before flight can be obtained and prevents accidental engagement of the law without understanding principles.

### **Compensation**

Prevents the degradation of a soul to the point that the soul cannot sustain its own life.

### **Earth systems**

The earth's systems can maintain themselves and work to 'right' themselves (repair itself, regain equilibrium) even under extreme pressure (pollution etc) from other forces.

### **Human bodies**

The human body has millions of automatic inbuilt correcting, detoxifying and eliminating systems that enable us to maintain life even under severe hardship or physical and emotional strain.

## Conclusion

### **Life principles:**

Allow any creation to receive God's Life Force and then be able to supply that life force through its own pro-creative ability. Life principles also ensure that life remains sacred and that all mechanisms are created to support and sustain life.

**Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that oppose life principles including:**

- War
- Abortion
- Health care
- Eating meat
- Pollution
- Fear of emotions
- Fear of death, etc

# Development Principles

## Summary

Development principles allow each creation, principle and law to evolve, grow and change positively ensuring:

- Expansive change is forced upon all matter
- Growth is supported, encouraged and sustained
- Positive development and evolution occurs for all matter
- Increasing capacities can develop within all creation
- Self-determination of the human soul

## Definition (What the principles are)

- The law shall force expansive change upon all matter
- The law shall enforce, support, encourage and sustain growth
- The law shall support, encourage and sustain development and evolution
- The law shall support adaptation to different environments

## Objectives (Why the principles are applied to law)

- To ensure an enhanced condition of love develops over time
- To ensure the entire universe and all creatures never remain stagnant
- To ensure increasing capacities within all creation
- To allow self-determination in the human
- To allow life to adapt to harmful environments created by the human

## Application (The creation and laws affected)

- Every law
- All matter living and non-living

## Reveals (What the principles reveal about God)

- God loves, desires and enjoys the growth and development of His creations
- God has an expansive and generous nature
- God is a parent who delights in the expansive growth and joy of the human
- God values and encourages the development of all creatures
- God is not motivated to punitively or arbitrarily restrict His Creations

## Examples (The principles' applications in law)

### **Gravity**

Gravity's existence allows my investigation and development in all forms of endeavour while remaining safe and secure.

### **Aerodynamics**

Knowledge of the law allows enhanced forms of travel and experiences (i.e. growth and development in my ability to move around).

### **Human bodies**

Sperm and egg. Woman's womb supports the environment of development. Allows reflexes and instinct to develop.

### **Compensation**

This law encourages me when I'm out of harmony with law to get into harmony with law by encouraging me to develop and change.

### **Design and development of the universe**

The entire universe allows positive and negative development, but supports and encourages positive development only.

### **Transformation**

The principle of development supports the complete transformation of the human into a different creature upon the reception of Divine Love.

## Conclusion

### **Development principles:**

Allow any creation to develop and change by ensuring that the mechanisms for change and adaptation exist within the creation itself, and exist within the controlling laws.

**Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that oppose development principles including:**

- Being attached to the past
- Nostalgic
- Opposing release of emotions
- Opposing resolution of interpersonal issues
- Opposing changes of family and friends
- Opposing experimentation
- Placing financial matters ahead of development

- Resisting emotional recognition of personal truth
- Restricting children's natural curiosity and experimentation
- Controlling outcomes and attempting to reduce the consequence of choices, etc.

# Economy Principles

## Summary

Economy principles ensure that each creation and law economically uses resources by ensuring:

- The equal value of resources (time, matter and energy)
- The economical use of resources to create function
- The automation of laws and creations (no external maintenance)
- Economy is incorporated within creation and law

## Definition (What the principles are)

- The law shall consider time, matter and energy as resources of equal value
- The law shall utilise all resources economically
- The law shall be automatic and does not require external maintenance
- The law shall be incorporated within the creation itself
- The law shall benefit all creation

## Objectives (Why the principles are applied to law)

- To ensure all resources combined are treated with equal value
- To ensure all resources combined are utilised efficiently for abundance
- To ensure all systems are sustaining, self-maintaining and self-repairing
- To ensure the individual creature is supported by creation collectively
- To ensure humans understand benefits of collective economy

## Application (The creation and laws affected)

- Every law
- All matter living and non-living

## Reveals (What the principles reveal about God)

- God feels time, matter and energy are equally valuable
- God feels economy and abundance are mutually inclusive
- God feels economy results in abundance for all creatures
- God's economy is not motivated by a feeling of lack
- God feels that love does not waste anything (we can think about this in terms of physical creation but also in terms of emotional and spiritual experiences)

- God focuses on the real benefit rather than any short term "satisfaction"

## Examples (The principles' applications in law)

### **Gravity**

One law has the same benefit to all living creatures.

### **Aerodynamics**

Knowing the higher law results in more economical use of time, energy and resources to accomplish larger outcomes (particularly if we redesigned the vehicle to have more loving energy sources and operation would result in no roads or destruction to environment through transportation).

### **Automation**

Instinct built into each living creature. Default operation built into all matter. e.g. Breathing; living organisms do not require decisions to breath.

### **Decomposition**

A decomposing tree creates fertile ground to sustain more life, food for insects, birds, animals and other living elements of the system, a pocket of light that allows smaller trees that were previously shaded to grow.

## Conclusion

### **Economy principles:**

Ensure all laws and creations economically use, and treat of equal value, all resources of time, energy and matter. Economy principles ensure that no resource is wasted, and that abundance exists naturally within the universe.

**Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that oppose economy principles including:**

- Placing financial matters ahead of time
- Matter and energy
- Creating without consideration for future resource usage
- Creating without concern for creatures that live afterwards
- Watering gardens
- Using chemicals that destroy
- Selfishly valuing my personal resources over the resources of others, etc.

# Function Principles

## Summary

Function principles ensure that each creation and law has many functional purposes by ensuring:

- The equal value of outcomes (results, beauty, and the use of resources of time, matter and energy)
- Each law and creation has multiple functions that are automatically fulfilled
- The economical use of resources to create multi-functionality
- The automation of function and outcome
- Creation itself instinctively "desires" to fulfil all outcomes

## Definition (What the principles are)

- The law shall quantify the economical use of resources (time, matter and energy), the obtained results, and beauty as **outcomes** of equal value
- The law shall ensure all **outcomes** are automatically fulfilled
- The law shall ensure creation itself instinctively "desires" to fulfil all **outcomes**

## Objectives (Why the principles are applied to law)

- To ensure all **outcomes** combined are treated with equal value
- To ensure all **outcomes** combined are fulfilled
- To ensure each creation itself fulfils all **outcomes**
- To ensure each creation supports a system that fulfils all **outcomes**

## Application (The creation and laws affected)

- Every law
- All matter living and non-living

## Reveals (What the principles reveal about God)

- God feels the only purpose of law is to create and enhance function
- God sees no point in creating without function or for beauty only
- God feels beauty is an inviolable part of loving function
- God enjoys function and beauty as mutually inclusive
- God creates function to inspire, satisfy, and increase the joy of the human soul

## Examples (The principles' applications in law)

### **Gravity**

Gravity keeps all unconnected matter sustained within an atmosphere, and the atmosphere itself is sustained by gravity (along with other substances).

### **Aerodynamics**

While only recently enjoyed by the human itself, birds and other creatures (insects, etc) have engaged flight that benefits humans (e.g. fly, ant, bee) collectively, and inspired humans (e.g. bird of prey) to learn the law.

### **Trees**

Trees have a multitude of functions, which include assisting survival and the creation of a usable atmosphere, habitat, heating, oxygen generation, removal of carbon dioxide, soil production, water management, as well as smelling good, supplying calming energy, and being beautiful to look at for humans.

### **Every human specific law**

Each human specific law has multiple functions of removing sin, causing transformation, as well as making the human itself feel, smell and look more beautiful.

## Conclusion

### **Function principles:**

Ensure all laws and creations have multiple functional purposes for their creation and existence, and treat of equal value, all resources of time, energy and matter, and all outcomes including function and beauty.

Function principles ensure that each creation has multiple purposes and that each purpose benefits other creations.

### **Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that oppose function principles including:**

- Not valuing resources (time, matter and energy), the obtained results, and
- beauty equally
- Creating without function
- Creating for a single function
- Destroying the environment to create
- Creating products that cover over truth (e.g. makeup for women), etc.

# Permanence Principles

## Summary

Permanence principles mean that all creation can rely on permanent law by ensuring:

- As leis são imutáveis, consistentes, permanentes e autoaplicáveis
- As leis são estruturadas, verificáveis e matemáticas
- As leis são mensuráveis, quantificáveis e observáveis
- A criação tem segurança e previsibilidade no universo

## Definition (What the principles are)

- The law shall be unchangeable, consistent and permanent
- The law shall be structured, verifiable and mathematical
- The law's results shall be measurable, quantifiable and observable

## Objectives (Why the principles are applied to law)

- To promote faith & trust in the Creator, Love, Truth, the environment & life
- To create stability and predictability in God's Universe
- To promote discovery, experimentation, education & learning
- To prevent negotiation, manipulation, and intentional misuse of the law
- To allow intelligent creatures to consistently and reliably create
- To enable discovery of individual truths via a large variety of fields of enquiry

## Application (The creation and laws affected)

- Every law
- All matter living and non-living

## Reveals (What the principles reveal about God)

- God's Love & Truth is consistent and permanent, verifiable & unchangeable
- God feels that Love must be consistent and permanent
- God desires humans to discover truth through their desires
- God is fixed and unmovable, unable to be manipulated, lied to or fooled
- God feels the same for all creations of the same type
- God wants to be trusted

## Examples (The principles' applications in law)

### **Gravity**

Gravity is consistent for the environment which allows for my security and safety in taking actions with predictability.

### **Aerodynamics**

The higher law, once known and understood, can be reliably, consistently, mathematically, safely and securely engaged.

### **Fibonacci numbers in nature**

As an artist (proportion, people, placement of objects, etc.)

As a scientist (rotation of leaf placement photosynthesis efficiency etc.)

As a cosmologist (design of galaxies, efficient distribution of energy)

As a marine biologist (efficient design and strength of living space - shells)

As a botanist (design of plants etc.)

### **Cause and effect**

Every effect of the same kind has the same cause.

### **Human soul**

Changes in my soul are measurable and repeatable.

## Conclusion

### **Permanence principles:**

Ensure all laws are unchangeable, consistent, permanent, and self enforcing and that creations can rely upon this fact. Permanence principles ensure that all creations of the same type function in the same manner so that function is certain.

### **Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that oppose permanence principles including:**

- Suggesting that love varies itself under different circumstances
- Believing all law is a "process of negotiation"
- Believing I can manipulate the law
- Feeling if no one is watching then laws are not enforced
- Feeling that I have a "special case or circumstance" to avoid law
- Believing that only actions can be governed
- Believing that superiority absolves me of certain law
- Believing that circumstances dictate whether to obey law

- Believing that financial considerations allow for disobedience
- Believing freedom means being able to ignore or break law
- Resisting growing faith based upon previous experience
- Suggesting that there is no such thing as absolute truth, etc.

# Scope Principles

## Summary

Scope principles guarantee creation is governed by law, and that new creations and laws can exist, by ensuring:

- Inbuilt rules are placed within each creation (e.g. genetics)
- Inbuilt rules determine the creation's potentials, energy flow and properties
- External rules affect each creation's properties and energy
- External rules allow for expansion of each creation's properties and energy
- External rules allow for new laws and creations
- External rules control the flow of energy between creations

## Definition (What the principles are)

- All creation shall be governed by law
- Inbuilt rules shall be inbuilt into each creation
- Inbuilt rules shall determine the creation's potentials
- Inbuilt rules determine the energy flow and properties of the creation
- New inbuilt rules are created when combined creations form a new creation
- New inbuilt rules determine the energy flow and properties of the new creation
- The energy flow shall be governed by inbuilt rules and external rules

## Objectives (Why the principles are applied to law)

- To allow for the Universe to exist
- To allow for simple and complex non-living and living creations to exist
- To allow for energy flow between creations
- To ensure that no creation is capable of anarchy
- To allow for automation of processes, functions, properties and life
- To allow for infinite combinations and permutations of: creation, new forms of creation, evolution and devolution, new inbuilt and external rules
- To create and allow for: self-enforcing law, self-maintaining law, new higher laws, external rules governing all creation, internal rules governing individual creation, properties for each individual creation combination

## Application (The creation and laws affected)

- Every law
- All matter living and non-living

## Reveals (What the principles reveal about God)

- God is extremely intelligent
- God is a careful planner and designer
- God is interested in allowing creation to communicate & gain knowledge
- God wanted mutually beneficial relationships between various creations
- God wanted no creation to exist independently
- God wanted potentials to be governed by the creation itself
- God made provisions for all new creations and laws
- God wanted a self-maintaining Universe
- God wanted no creation to experience complete separation from God
- God wanted all devolution to result in further creation

## Examples (The principles' applications in law)

### **Gravity**

Gravity is not actually a single law or phenomenon. As a law it is actually a combination of creations and laws which, when combined make a higher law.

### **Aerodynamics**

Aerodynamics is not actually a single law or phenomenon. As a law it is actually a combination of creations and laws which, when combined, make a higher law. It also involves many lower laws from a wide range of fields.

### **Human bodies**

A combination of laws and substances, which include the flow of energy system (life), made from a combination of elements (which are governed by their own laws), made from a combination of atomic and sub-atomic particles (which also are governed by their own laws), which are made from a specific combination of particles (themselves also governed by specific laws).

In addition, some external creations (such as viruses, and bacteria) which exist as separate organisms governed by their own laws, exist within the body. Also, the body communicates with the controlling soul and spirit body through a set of laws, and has the potential to communicate with anything in the rest of the Universe through another set of external laws.

Each system within the body is also governed by its own set of laws but these, in a healthy system, work harmoniously to complete the whole creation and function of the human body.

## Conclusion

### **Scope principles:**

Determine the existence of the universe itself, everything within the universe, how everything communicates with all elements of the universe, how new creations and laws appear in the universe, and also the inbuilt soul based mechanisms via which the highest creation within the Universe is able to communicate with God.

**Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that oppose scope principles including:**

- Creating objects and systems that work against the environment and require maintenance
- Creating without understanding the laws governing the constituent elements of the creation (e.g. chemical genetic manipulation, anti-bacterial or viral medication etc)
- Creating 'medicines', 'solutions' or 'remedies' that deal only with effects (and don't consider the scope of what is occurring and why a 'symptom' exists)
- Attempting to overcome or interact with a single law, or the effect of a single law, without considering the other laws that operate in unison with that law, etc.

# ORDER PRINCIPLES

## Hierarchy Principles

### Summary

Hierarchy determines the position or place of each creation and law within the Universe, and the power and energy each creation or law has over other creations and laws lower in the hierarchy.

- Determine the hierarchy of law by the complexity of each law
- Determine the hierarchy of creation by the complexity of each creation
- Ensure more complex creation is governed by more complex laws
- Ensure higher creations and laws exert more power, have more energy, and more complex properties

### Definition (What the principles are)

- The Hierarchy of creation shall be determined by each creation's complexity
- The Hierarchy of law shall be determined by the complexity of each law
- Each more complex creation in the hierarchy of creations shall be governed by a hierarchy of more complex laws
- To ensure that creations and laws that are higher in hierarchy exert more power and have more complex properties

### Objectives (Why the principles are applied to law)

- To ensure each creation is governed by law
- To ensure all matter can be broken down into its individual components
- To prevent the complete destruction of any form of matter
- To allow for the creation of more complex law
- To allow for the creation and survival of more complex creations
- To allow creations of higher complexity to contain more complex inbuilt rules
- To allow for each more complex individual law to more powerfully affect creations of higher complexity
- To allow for each more complex individual creation to have a more powerful energy flow and effect on creations of lower complexity
- To allow for each more complex individual law to have a more powerful effect on laws of lower complexity
- To create implied, instinctual or automatic governance, responsibility and compensatory systems which are not based upon will or desire but rather upon hierarchy

## Application (The creation and laws affected)

- Every law
- All matter living and non-living

## Reveals (What the principles reveal about God)

- God desires His creations to have the ability to create
- God is generous and sharing in His Nature
- God desires that each creation lives in relationship with other creations
- God feels that relationships are important and bring satisfaction of desires
- God creates instinct in all creatures for common functions
- God creates properties in all matter for common functions
- God feels that common purpose brings more powerful beneficial results
- God feels each creation component has value and is necessary and essential for the operation of the whole

## Examples (The principles' applications in law)

### **Gravity**

Gravity is actually a combination of creations (matter) and laws (rule sets) creating a new law we call gravity. The greater the mass the greater gravitational force is exerted on other matter. This creates a law that maintains automatic safety for sustained life and development.

### **Aerodynamics**

Aerodynamics is actually a combination of creations (matter) and laws (rule sets) creating a new law we call aerodynamics. It involves many lower laws from a wide range of fields including physics of motion, material properties, fluid dynamics, pressures and temperatures and so forth.

### **Human bodies**

Hydrogen and oxygen, water, blood, cardiovascular systems, energy systems, human body discussion and example of creations of law and new law interactions with the environment and the injection of the life principle.

### **Human soul**

Connection with physical body (most complex physical creation). Connection with spirit body (most complex spirit based creation). The human soul energy systems and receiving substances from God.

## Conclusion

### **Hierarchy principles:**

Hierarchy determines the position or place of each creation and law within the Universe and creates implied, instinctual or automatic governance, responsibility and compensatory systems. Hierarchy extends the Scope principles by placing Scope within a Hierarchical system. Scope allows for Hierarchy to exist.

### **Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that oppose hierarchy principles including:**

- Feeling and believing I individually and humans collectively do not have control over our own creations (e.g. sin, disease, sickness, accidents etc.)
- Feeling and believing I can circumvent or am more powerful than the laws that govern me, etc.

# Governance Principles

## Summary

Governance principles ensure:

- Everything is under God's Authority
- God's Laws control and govern all of creation
- God's Laws allow human souls to share governance
- Each human soul automatically governs, but the power of governance is determined by development

## Definition (What the principles are)

- God's nature, character, attributes, desires & personality determine God's Principles
- God's Principles determine God's Laws
- God's Laws shall control and govern all of creation
- God's Laws allow all human souls to share governance
- Each human soul automatically governs, but the power to govern is determined by development

## Objectives (Why the principles are applied to law)

- To ensure that God has ultimate and complete authority
- To allow God's highest creation (the human soul) to share in governance
- To gift to the human soul the ability to control its external environment based upon the human soul's development (positively or negatively)
- To ensure the human soul becomes educated in the effects of the use of power
- To give more power to those in higher development
- To restrict the power of those in lower development
- To allow the human soul to create independently of God
- To ensure creations of the human soul that are out of harmony with God's
- Principles are eventually destroyed

## Application (The creation and laws affected)

- All law
- All matter living and non-living
- Specific laws pertaining to the human soul
- Specific laws governing the creations of the human soul

## Reveals (What the principles reveal about God)

- God takes full responsibility for God's Creations
- God entrusts Her highest creation to govern in harmony with God
- God desires the highest creation to share Her Joy of creating
- God gifted to Her highest creation the potential of greater power over the environment by giving them the potential to develop
- God educates the highest creation in the loving use of power
- God loves giving and sharing power
- God makes provision for the human soul being repentant and changing

## Examples (The principles' applications in law)

### **Gravity & aerodynamics**

The human body is governed by gravity unless it learns of a higher law (aerodynamics) which can overcome gravity. The process of learning enables the human soul to develop more knowledge which then allows using different laws to overcome the limitations of gravity. The human soul creates a device using current known laws to benefit itself.

### **Law of Attraction**

The human soul automatically governs via the soul's developed condition. The condition controls substances, creatures and events in harmony with the law so that the soul attracts these resources to aid in exposing to itself its current developed condition. The governance principle ensures these attractions occur to aid the soul in its own self-awareness.

### **Environmental responses**

The soul is like a transmitting antenna sending to its environment its own governance condition (developed soul condition). Each external creation responds individually and collectively, to the individual and collective soul condition of the human. Humans individually and collectively make decisions and choices either in or out of harmony with Love (thoughts, emotions, and actions) based upon condition. This improves balance or creates imbalance in the environment and the results can be measured.

### **Human bodies**

Each system within the body is also governed by its own set of laws. In a healthy person the governing system works harmoniously to complete the healthy creation and function of the bodies.

## Conclusion

### **Governance principles:**

Ensure that God has authority over all Principles, Laws and Creations, but that each creation with free will and self-awareness does automatically, and can with education and knowledge, affect and control the positive or negative development of its environment.

**Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that oppose governance principles including:**

- Not taking control of their own creations external to and within their own bodies (e.g. sin, disease, sickness, accidents etc)
- Desiring authority and power without love or development
- Creating without the ability to govern
- Denying the effect of their governance over other creatures upon those creatures, etc.

# Responsibility Principles

## Summary

Responsibility principles:

- Force the human to be self-responsible
- Encourage the human to desire self-responsibility
- Allow God to reward true self-responsibility with role-responsibility (i.e. role-responsibility is a compensatory gift given to those with self-responsibility)

## Definition (What the principles are)

- The highest creation shall be a self-responsible being
- The law shall enforce self-responsibility
- The law shall reward self-responsibility with role-responsibility (i.e. role responsibility is a compensatory gift given to those with self-responsibility)

## Objectives (Why the principles are applied to law)

- The highest creation must be made responsible for the ownership and expression of its will, desire, passion, emotion, thoughts and actions
- To ensure highest creation is accountable
- To ensure anarchy is not possible for any creation
- To restrict the highest creation from irreversibly harming any creation
- To educate the highest creation that love is responsible and accountable
- To determine individuals who qualify for role-responsibility
- To reward self-responsible individuals with role-responsibility
- To ensure that an individual's nature is fully satisfied and experienced
- To form a foundation for God's highest principles that apply to the human soul such as Will, Desire, Compensation, Redemption and Transformation.

## Application (The creation and laws affected)

- All laws governing the human soul
- All laws governing the creations of the human soul
- A secondary effect on all laws and all creation

## Reveals (What the principles reveal about God)

- God feels Love always takes responsibility for creation

- God feels Love is always directly accountable for creation
- God is not reckless in creating the highest creation
- God has taken responsibility for His creation of the highest creation
- God wants the highest creation to enjoy its own nature
- God loves all creation enough to restrict the highest creation
- God loves rewarding those who act lovingly
- God feels joy comes from self-care

## Examples (The principles' applications in law)

### **Gravity & aerodynamics**

Soul responsibility is enforced upon any person who wilfully attempts to break the Law of gravity or aerodynamics by using the law to desire to, or actually, harm themselves or others through negligence or direct action.

### **Law of Cause & Effect**

Ensures individuals discover the relationship between what has happened (the effect) and what has caused the effect (the cause) so that individuals take full responsibility for their will, desire, passion, emotion, thoughts and actions.

### **Law of Compensation**

Ensures individuals discover and receive the rewards for their own individual and collective responsible choices, and discover and receive the penalties for individual and collective irresponsible choices.

### **Law of Repentance**

Ensures individuals become emotionally aware and emotionally repentant for each unloving choice and decision and become emotionally aware of his or her powerlessness to undo everything that has resulted from his or her unloving behaviour.

## Conclusion

### **Responsibility principles:**

Responsibility principles ensure that God's highest creation is self responsible, and is given role responsibilities in line with individuality and development.

Scope, hierarchy, governance, responsibility and compensation form a foundation for principles that apply to the potentials of the human soul such as will, desire, redemption and transformation.

**Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that oppose responsibility principles including:**

- Wanting to be saved (by God, Jesus, parents, friends, partners, others) from the results of my creations
- Not taking responsibility for my emotions, desires, words or actions
- Wanting power without responsibility or development
- Wanting role-responsibility without self-responsibility
- Placing people in positions of societal power (role responsibility) when they are not self-responsible
- Looking up to and seeking guidance, 'truth' and 'love' from people who are not self-responsible (e.g. family, gurus, teachers, counsellors, etc.)

# Compensation Principles

## Summary

Compensation principles:

- Educate the human soul about the concept of sin
- Provide compensation (reward or correction) to the soul
- Ensure self-responsibility is the measure for compensation
- Force the highest creation to be responsible and accountable
- Compensate consistently and predictably according to the soul's actual level of self-responsibility whether the external environment is affected or not

## Definition (What the principles are)

- The law shall provide compensation to the soul and its environment
- The law shall ensure self-responsibility is the measure for compensation
- The law shall ensure that the highest creation is made responsible and accountable for its own level of self-responsibility via compensation
- The law shall have a consistent compensatory effect according to the soul's level of self-responsibility whether the external environment is affected or not by the soul's emotions, decisions, and actions

## Objectives (Why the principles are applied to law)

- To compensate the highest creation for its own level of self-responsibility
- To educate the highest creation that love creates pleasure and sin creates pain
- To educate the highest creation that the gift of free will brings responsibilities
- To create the framework for evolution and devolution of the soul
- To allow intelligent creations to solve problems associated with cause & effect
- To generate within the highest creation a desire for truth and love
- To build on the Responsibility principle to create the foundation for God's highest principles that apply to the human soul such as will, desire, redemption and transformation

## Application (The creation and laws affected)

- All laws governing the human soul
- All laws governing the creations of the human soul
- A secondary effect on all laws and all creation

## Reveals (What the principles reveal about God)

- God feels Love always rewards self-responsibility
- God was not reckless in creating Her highest creation
- God has taken responsibility for Her creation of the highest creation
- God wants the highest creation to understand how to enjoy life
- God loves all creation enough to restrict the highest creation
- God loves rewarding those who act lovingly
- God feels joy comes from self-responsibility
- God feels everything is connected, and nothing operates in a vacuum
- God feels love provides loving limitations and takes corrective action
- God honours free will choices and decisions
- God feels humans must take full responsibility for their own creations
- God feels the heart-felt condition of the human is of extreme importance
- God believes in and supports the redemption of the human towards goodness
- God feels recovery from bad choices is possible since he made it possible

## Examples (The principles' applications in law)

### **Gravity & aerodynamics**

Compensation is provided, through the form of physical, emotional, and spiritual pleasure or pain, for obedience or disobedience to the laws of gravity or aerodynamics. The amount of compensation is applied consistently based upon the level of self-responsibility and the intention of the individual.

### **Law of Cause & Effect**

Ensures individuals are compensated for the cause that exists within them based upon their level of self-responsibility so that the individual is educated about the relationship between causes and effects, and can take actions to remove causes that generate undesired or painful effects.

### **Law of Compensation**

This law merges the principles of Will, Desire, Scope, Hierarchy, Responsibility and Compensation into a single complete law system that is then applied to the human soul itself, and in a secondary manner, to all of creation. Provides rewards and corrections.

### **Law of Repentance**

Repentance is God's desired attitude from the human towards disobedience to all law.

Repentance would not be possible as a concept if Compensation principles did not exist. i.e.

Compensation provides the measure of whether something is "good" (in harmony with Love) or "bad" (out of harmony with Love). Without the measure, no repentance is possible.

Disobedience without compensation would result in no correction of disobedience, and therefore repentance for disobedience would also not be possible.

## Notes

- Sins committed by others that affect me attract pleasurable compensation and allowance towards me
- Sins committed by me that affect others trigger a pleasurable compensation and allowance towards others
- Sins committed by me attract a negative penalty towards myself
- Sins committed by any person trigger a negative penalty toward those who committed the sin

## Conclusion

### **Compensation principles:**

Ensure that God's highest creation becomes aware of and is compensated (rewarded or corrected) for the manner in which it engages self-responsibility.

Compensation principles are also linked to scope, hierarchy, governance and responsibility, and form a foundation for God's highest principles that apply to the human soul such as will, desire, redemption and transformation.

### **Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that oppose compensation principles including:**

- Feeling that disobedience will never be penalized or corrected and obedience will never be rewarded
- Feeling they can sin with impunity, minimizing and justifying sin
- Feeling that they only sin if they act (e.g. get your "sexual" appetite anywhere, release it at home)
- Complaining about the negative compensation effects that the person has created through their own free will choices, etc.

# SOUL SPECIFIC PRINCIPLES

## Human Will Principles

### Summary

Human Will principles:

- Ensure all laws respond to the will of the human
- Ensure all laws satisfy the will used in harmony with God's Love and correct the will used in disharmony with God's Love
- Give power and joy to God's Highest Creation to create independently, to govern, to be responsible, compensated and redeemed

### Definition (What the principles are)

- The Law shall respond to will
- The Law shall satisfy will used in harmony with God's Principles
- The Law shall correct will used out of harmony with God's Principles

### Objectives (Why the principles are applied to law)

- To allow God's Highest Creation to create independently
- To ensure God's Highest Creation governs and is self-responsible
- To give role-responsibility to humans who are self-responsible
- To enforce compensation to humans for the use of will
- To ensure that all creation responds to human governance
- To ensure God's Laws create attractions based upon will
- Compensation, responsibility, governance, redemption and transformation principles are applied uniquely to humans because of the gift of free will

### Application (The creation and laws affected)

- All Laws governing the human soul
- All Laws governing the creations of the human soul
- A secondary affect on all laws and all creation

### Reveals (What the principles reveal about God)

- God respects and honours His gifts to humans

- God generously desires humans to experience the joy of creation
- God feels that real joy comes from being self-responsible
- God feels love involves providing potentials for the expression of will
- God wants us to be emotional beings with capacity for happiness

## Examples (The principles' applications in law)

### **Gravity & Aerodynamics**

Engaging the laws of aerodynamics is only possible for humans by using will to understand the laws. Compensation is applied for will based engagement with both laws.

### **Law of Attraction**

Our will (current soul based condition) determines what we currently attract. All attractions either correct or reward our condition. Determining attractions with the mind is a pointless exercise.

### **Law of Cause and Effect**

Human health is only possible by understanding the relationship between the unloving use of our will and disease or sickness occurring in the human body. Each specific disease or sickness results from a specific unloving emotion, either directed towards self, another person, or the environment.

### **Redemption of the human soul**

Redemption principles operate automatically to change the will by causing the creation of pain when we sin and the release of pain when the pain becomes too intense to suppress within us. Redemption principles can be engaged with desire by making a choice to emotionally engage forgiveness and repentance with faith in emotional release being of benefit, which rapidly speeds the process of redemption.

Redemption principles can be engaged with God, by sincerely desiring God's love and forgiveness (the desire is repentance), which has the added benefit of preparing the soul through prayer for the reception of God's Love and the establishment of a relationship with God.

### **Development of the human soul**

Development of the human soul (to the perfect natural human) is possible without awareness due to the Laws of Compensation and principles of redemption operating upon the will. i.e. By causing the creation of pain when we sin and the release of pain when the pain becomes too intense to

control. Eventually development results in the redemption of the human soul to the point of the perfect natural human, but no further development can be obtained without desire.

## Conclusion

### **Human Will principles:**

Human Will principles allow the human soul to be the creation at the top of the hierarchy system, to be responsible, to govern, and be compensated and redeemed.

Will is driven by the soul's current condition and determines what the soul will automatically do in the current moment unless desire is engaged to progress or regress.

**Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that oppose human will principles including:**

- Attempting to use will-power to change
- Refusing to admit to my current emotional condition
- Refusing to admit my sin
- Refusing self-awareness, pride, being driven by addiction, acting upon unloving desires (causing my will condition to degrade)
- Denying responsibility for my will (denying I have choice)
- Blaming others for the use of my will (my past pain, others in my life), etc.

# Human Desire Principles

## Summary

Human Desire principles:

- Ensure all laws respond to the desire of the human
- Ensure all laws satisfy the desire used in harmony with God's Love and correct the desire used in disharmony with God's Love
- Allow the potential for change, growth, development and transformation of the human soul into a Divine being with immortality by engaging God's
- Principles of Redemption and Transformation

## Definition (What the principles are)

- The Law shall respond to desire
- The Law shall satisfy desire used in harmony with God's Principles
- The Law shall correct desire used out of harmony with God's Principles

## Objectives (Why the principles are applied to law)

- To allow God's Highest Creation to change and grow irrespective of its current soul condition or external environmental factors
- To allow God's Highest Creation to experience the happiness of having desires in harmony with Love satisfied
- To allow God's Highest Creation to experience the pain of having desires out of harmony with Love satisfied
- To ensure that humans see the true effect of their desires upon creation
- To ensure God's Laws create attractions based upon desire
- To ensure new potentials exist for humans based upon desire
- To ensure that "wish and desire is closely interwoven with the opportunity for gratification" Aphraar, Through the Mists
- New potentialities of Compensation, Responsibility, Governance, Redemption and Transformation principles are enabled by human desire

## Application (The creation and laws affected)

- All Laws governing the human soul
- All Laws governing the creations of the human soul
- A secondary affect on all laws and all creation

## Reveals (What the principles reveal about God)

- God respects and honours His Gifts to humans
- God generously desires humans to experience the joy of desire
- God feels that real joy is experienced by having loving desires satisfied
- God's Love provides potentials that result from the expression of desire
- God wants humans to be desirous beings with new aspirations
- God feels desire is an essential part of living
- God feels love gives humans the potential to change

## Examples (The principles' applications in law)

### **Gravity & aerodynamics**

Engaging the laws of aerodynamics was only possible for humans by someone using their desire with faith to understand the laws. Desire is rewarded by knowledge being obtained.

### **Law of Attraction**

Our desire (genuine expression of soul based faith) determines what we attract now to enable change. All attractions "satisfy" our current desire, even when those desires are unloving. Unloving desires can be measured by the pain they create.

### **Human hunger**

True hunger compared to addictive eating. True hunger is an automatic animal instinct necessary for survival of the body connected to an undeveloped soul. Addictive hunger is a desire to satisfy the demands of our current emotional condition (our will).

### **Redemption of the human soul**

Redemption principles operate automatically to change the will by causing the creation of pain when we sin and the release of pain when the pain becomes too intense to suppress within us. Redemption principles can be engaged with desire by making a choice to emotionally engage forgiveness and repentance with faith in emotional release being of benefit, which rapidly speeds the process of redemption.

Redemption principles can be engaged with God, by sincerely desiring God's love and forgiveness (the desire is repentance), which has the added benefit of preparing the soul through prayer for the reception of God's Love and the establishment of a relationship with God.

### **Transformation of the human soul**

Transformation of the human soul (into the Divine angel) is not possible without desire. Desire draws Transformation principles into play in Laws operating upon the human soul, and desire for God also engages God's Desire to transform the human through the transmission of God's Love into the human soul. The subsequent result is not only an increasing relationship with God, but, due to the reception of God's Love, the transformation of the soul itself into a new creature with increased current capabilities and future potentials.

## Conclusion

### **Human Desire principles:**

Human Desire principles allow the potential for change, growth, development and transformation of the human soul into a Divine being with immortality.

Desire is driven by what the soul currently has faith in and determines what the soul desires in and for its future. If will and desire are in harmony change is not possible.

### **Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that oppose human desire principles including:**

- The concept that desire must be suppressed to attain spiritual enlightenment
- Constantly needing to be inspired
- Resisting the development of my own aspirations
- Resisting the development of faith
- Remaining ignorant of my own potential
- Refusing to recognize and respond to my own desires (either acting upon loving desires or removing the causes of unloving desires)
- Telling myself I have 'desire' for something when my actions do not reflect this desire and my will does not change, etc.

# Human Redemption Principles

## Summary

Human Redemption principles:

- Enforce compensation upon human will and desire
- Ensure human redemption of the soul's will to recover the human soul back to its created pristine condition
- Encourage a desire for Divine redemption to speed the recovery of the human soul, begin to establish and grow a relationship with God, and precondition the soul allowing transformation into the Divine to begin

## Definition (What the principles are)

- The Law shall enforce compensation upon will and desire
- The Law shall ensure human redemption
- The Law shall encourage Divine redemption

## Objectives (Why the principles are applied to law)

- To allow the soul to recover from its own degradation
- To repair the soul's personal relationship with all other creation and self
- To allow the removal of pain and its causes from the soul
- To ensure compensation for all sins committed by the soul
- To encourage within the soul the development of a desire for a more pleasant personal life and a more pleasant affect on other creation
- To educate the soul about the effects of sin, and to encourage repentance and forgiveness in relation to sins committed towards self, other humans, God's Creations, God's Laws, God's Principles and God Herself
- To educate the soul about its own lack of ability and power to fully correct the results of sin without God's assistance
- To encourage the soul to desire an ever expanding infinite relationship with Go

## Application (The creation and laws affected)

- All Laws governing the human soul
- All Laws governing the potential of the human soul
- A secondary affect on all laws and all creation

## Reveals (What the principles reveal about God)

- God desires humans to recover from their own degradation
- God desires humans to understand the cause of their own unhappiness
- God desires close relationships between individual humans and between humans and other creations
- God desires a loving personal relationship with every human
- God rewards forgiveness and repentance
- God desires humans to realize that they need God
- God desires humans to exercise desire rather than being motivated by fear or forced by law
- God does not bear a grudge towards sinners and does not eternally punish them
- God does not need a "sacrifice" in order to forgive sin but rather God prefers obedience

## Examples (The principles' applications in law)

### **Gravity & Aerodynamics**

Each physical law has built-in properties which examine the intention and motivation of the human. If the physical law is wilfully broken with intent to harm oneself or another soul, then there are very severe penalties imposed upon the soul with that intention and motivation, even if the intention was only felt rather than acted upon.

### **Law of Compensation**

The Law of Compensation itself involves the application and inclusion of every principle discussed until this point. Human Redemption principles ensure that Compensation principles are not permanently applied to the human soul without some remedial feature; otherwise the result would be the human soul never being able to recover from degradation.

### **Redemption of the perfect natural human**

Redemption principles ensure that the human, no matter how he or she has used his or her will or desire, can recover from all the degradation and return to its original created perfection.

### **Development of relationship with God**

Redemption principles ensure that the human can not only redeem self without God's assistance, to the point of its original created perfection, but can also begin to be educated about the necessity of a complete relationship with God and to engage God's mercy to allow self to begin transformation from its original created condition into another creature, the Divine angel. Redemption principles allow the human to see that it needs God in order to complete the process of full redemption, and therefore any further development must also require God.

## Conclusion

### **Human Redemption principles:**

The Human Redemption principles work upon my will to remove sin in order to recover myself back to the created pristine condition (human redemption). If I engage my desire, Human Redemption principles can also begin the process of entering a relationship with God and eventually obtain immortality (divine redemption).

Desire for Divine redemption will speed the emotional recovery of the human soul, begin to establish and grow a relationship with God, and precondition the soul to allow transformation into the Divine to begin.

### **Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that oppose human redemption principles including:**

- Rejecting the concept of sin
- Wilfully sinning
- Rejecting God's definition of love
- Retaining human definitions of love
- Rejecting repentance
- Immoral and unethical emotions and actions
- Remaining ignorant
- Attempting to reverse sickness and disease through physical means, etc.

# Human Transformation Principles

## Summary

Human Transformation principles:

- Allow desire driven transformation from the human soul into a Divine soul
- Allow desire driven absorption of God's attributes by the human soul
- Allow the entire soul (both halves) to join in full self-awareness
- Assign the gift of immortality to the human soul who transforms
- Assign the potential of infinite expansion and expression to the human soul

## Definition (What the principles are)

- The law shall enable the transformation of the human into the Divine
- The law shall offer the potential of immortality
- The law shall offer other Divinely infinite potentials to the human soul
- The law shall enable the soul to create ever increasing new universes to allow for the soul's infinite expansion and expression

## Objectives (Why the principles are applied to law)

- To create the external potential for every soul to understand God and receive communication and substances from God
- To create the internal potential in every soul to understand God and receive communication and substances from God
- To ensure the soul with desire can expand in its internal capabilities and awareness enough to grasp, understand, receive communication and substances from God
- To allow the soul with desire to have indisputable proof of God's Personal Love and also, as a result of receiving God's Love, God's Existence & Character
- To ensure the soul with desire can complete the necessary transformation required to become Divine
- To allow substantive parts of God's Attributes and Character to be absorbed by the human soul
- To ensure the human soul is able to become immortal
- To ensure the human soul has infinite potential
- To ensure the whole soul can become self-aware

## Application (The creation and laws affected)

- All laws governing the human soul's expression of desire

- All laws governing the potential of the human soul
- A secondary affect on all laws and all creation

## Reveals (What the principles reveal about God)

- God's Love is infinitely generous
- God's Love does not force transformation upon unaware souls
- God's Love responds to sincere desire and longing
- God has a personal interest in each person and their happiness
- God desires humans to understand what God feels like
- God desires humans to become immortal (guarantees living forever)
- God has principles and laws that govern the flow, reception and transmission of love from any source
- God desires to share God's Attributes and Substances with all of her children
- God desires open communication with all of Her children

## Examples (The principles' applications in law)

### **Prayer**

Prayer is not governed by laws that contain any universe. Since prayer begins in the soul and enters the soul of God (who is not contained within any universe but who contains all universes and potential universes infinitely), the laws that govern transformation of the human soul are beyond all universes. Transformation principles enable laws governing prayer to exist and to operate in and outside of the laws governing all universes.

Prayer is an emotion felt within the soul, but since the soul is connected to the two bodies, prayer feels like it is coming from the bodies.

If prayer was coming from the brain existing within the body, and was bound by the currently discovered laws of the physical universe and operating at the speed of light, and if God was only as near as the nearest star, it would take 8 years to transmit the prayer from the body to God, and another 8 years to receive a reply.

### **Reception of God's Love**

God's Love exists outside of all universes. Transformation principles allow God's Love to be received by souls who perceive themselves to be within the physical universe, and allow those souls to gain awareness of the union condition and expand beyond the soul universe into ever increasing universes of larger size.

### **The unaware soul**

The unaware unified soul does not and cannot exist within the physical universe. The unaware soul remains within the soul universe while connecting into 2 pairs of bodies (physical and spiritual) through the instinctual incarnation process in order to engage in the embryonic stage of learning about itself.

The physical and spiritual bodies are required by one half of the soul in order for the soul half to experience the physical and spiritual universe. This allows the soul half to be educated about love, inter-dependence, masculinity and femininity, and a huge number of other topics.

### **Soul union condition**

Soul union is the condition of being completely self-aware as a unified soul. The physical and spiritual bodies cannot enter the soul universe, but the soul, due to Transformation principles not only exists in the soul universe, but potentially can expand into ever increasing hierarchical universes made from different substances and having a larger size but still contained within the infinite.

## **Conclusion**

### **Human Transformation principles:**

Human Transformation principles are the most highly complex principles governing God's Laws and God's Highest Creation, create laws that exist outside of all current universes, and also outside of any new potential universes that could exist.

Desire for and reception of God's Love is the human controlled mechanism by which transformation of the soul into a Divine creature occurs, and the transformed soul becomes completely self-aware, is assigned the gift of immortality and has the potential of infinite expansion and expression.

### **Humans frequently justify & minimize desires, attitudes, emotions, thoughts and actions that oppose human transformation principles including:**

- Rejecting God
- Rejecting God's Love
- Rejecting God's Truth
- Rejecting God's Principles and laws
- Rejecting faith
- Rejecting the potential of a spiritual afterlife
- Agnostic or atheistic beliefs
- Religious beliefs in disharmony with God's Love and Truth
- Wilfully engaging unloving behaviour
- Desiring ignorance
- Retaining human definitions of love
- Desiring to remain self reliant
- Believing 'I am God'
- Arrogance, narcissism, and desire to hold onto current self perception
- Holding onto emotions that resist the reception of love (from any source), etc.
