

ALANA G. GONZALES

alanagonzales@arizona.edu | linkedin.com/in/alana-gabrielle-gonzales/ | alanagonzales.net

EDUCATION

PhD Student in Optical Sciences, The University of Arizona, Tucson, AZ August 2023 – Present
GPA: 3.85/4.0

Master of Science in Biomedical Engineering, Duke University, Durham, NC May 2022
GPA: 3.97/4.0 | Graduate Certificate earned in Global Health

Bachelor of Science in Biomedical Engineering, *cum laude*, The University of Arizona, Tucson, AZ May 2020
GPA: 3.69/4.0

Bachelor of Arts in 3-2 Engineering, Scripps College, Claremont, CA May 2020
GPA: 10.67/12

Danish Institute for Study Abroad, Copenhagen, Denmark January 2017 - May 2017

RESEARCH AND RELEVANT WORK EXPERIENCE

Graduate Researcher, Wyant College of Optical Sciences August 2023 – Present
Faculty Advisor: Jennifer Barton, PhD, Departments of Optical Sciences and Biomedical Engineering
University of Arizona, Tucson, AZ

- 2023-2024 **DeMund Foundation Graduate Student Endowed Scholarship in Optical and Medical Sciences**
- 2024-2025 **Kenneth E. and Michele L. Moore Endowed Scholarship in Optical Sciences**
- Project: Developing an endoscopic imaging system for early detection of gastric cancer using optical coherence tomography (OCT), doppler OCT (DOCT), and optical coherence elastography (OCE)
- Designing and constructing optical system, including lens and piezoelectric scanning mechanism

Associate Research Scientist, SiPhox, Inc., Burlington, MA June 2022 – August 2023

- Developed point-of-care and at-home diagnostic assays with robust photonic chip technology
- Planned and carried out experiments, analyzed results, and made decisions to progress research

Graduate Researcher, Center for Global Women's Health Technologies July 2020 – May 2022
Faculty Advisor: Nirmala (Nimmi) Ramanujam, PhD, Department of Biomedical Engineering
Duke University, Durham, NC

- 2020-2021 Fitzpatrick Institute for Photonics (FIP) **John T. Chambers Fellowship**
- 2021-2022 Duke University **Biomedical Engineering Second Year Fellowship**
- Project: Tested the ability of a low-cost, image-guided ablative therapy for breast and cervical cancer to induce tumor necrosis and long-lasting immune responses in preclinical murine models
- Conducted longitudinal studies in mice to assess survival, tumor growth, and anti-tumor immune response following breast and cervicovaginal tumor ablation with *in vivo* bioluminescence imaging

RESEARCH AND RELEVANT WORK EXPERIENCE, CONTINUED

Research Trainee, Maximizing Access to Research Careers (MARC) Program May 2018 – May 2020
Faculty Mentor: Jeong-Yeol Yoon, PhD, Department of Biomedical Engineering
The University of Arizona, Tucson, AZ

- Project: Developed a novel optical biosensor using a paper-based lateral flow immunoassay and a smartphone-based fluorescence microscope for: 1) quantifying cancer cells in the blood at the point of care, 2) measuring plant genome sizes in the field, and 3) detecting norovirus in water samples
- Designed and built an imaging apparatus to improve the device ease-of-use and quality of smartphone fluorescence images using SolidWorks and 3D printing
- Created two graphical user interfaces for simple, automated processing of fluorescence images in MATLAB and Python, respectively

Intern, Massachusetts Institute of Technology Summer Research Program (MSRP) Summer 2019
Faculty Mentor: Roger Kamm, PhD, Departments of Biological and Mechanical Engineering
Massachusetts Institute of Technology, Cambridge, MA

- Project: Developed an *in vitro* cell culture model of T cell trafficking and migration to tumors
- Designed two experimental setups to model T cell adhesion and migration relative to human endothelial cells using a Transwell migration assay, 2D cell culture and fluorescence microscopy
- Wrote scripts in ImageJ and RStudio to analyze microscopy data

EXROP Fellow, Howard Hughes Medical Institute (HHMI) Summer 2017
Exceptional Research Opportunities Program (EXROP)
Faculty Mentor: Muhammad Zaman, PhD, Department of Biomedical Engineering
Boston University, Boston, MA

- Project: Optimized a fluorescence assay for field-based quantification of antimalarial medicines
- Performed fluorescence measurements using spectrophotometry and a portable microfluidic device
- Improved the accuracy and precision of measurements by troubleshooting pharmaceutical sample preparation and signal acquisition parameters

Student Researcher, Danish Institute for Study Abroad (DIS) Science Research Practicum Spring 2017
Faculty Mentor: Abigail Mackey, PhD, Institute of Sports Medicine
Bispebjerg Hospital, Copenhagen, Denmark

- Project: Studied the effects of exercise-related injury on skeletal muscle and muscle fiber regeneration
- Quantified amounts of different fiber types in injured skeletal muscle tissue using fluorescence microscopy

RESEARCH AND RELEVANT WORK EXPERIENCE, CONTINUED

Summer Fellow, Medical Scientist Training Program Summer 2016

Summer Undergraduate Research Fellowship (MSTP-SURF)

Faculty Mentor: Karen Christman, PhD, Department of Bioengineering

University of California, San Diego, CA

- Project: Tested the efficacy of an extracellular matrix (ECM)-based hydrogel derived from porcine tissue as a delivery method for therapeutic microRNAs
- Fabricated the ECM-based hydrogel by decellularizing porcine tissue with appropriate reagents
- Measured the rate of release of microRNAs from the hydrogel using spectrophotometry
- Quantified degradation of microRNAs using PCR and gel electrophoresis

Math Tutor, Math Spot Tutor Center, Scripps College January 2015 – December 2016

- Led group and individual tutoring session for students in Scripps College math courses: Calculus I, II, and III and Differential Equations
- Provided students with resources for understanding and solving problems and improving their skills in mathematics

Research Assistant, Interdisciplinary Consortium on Advanced Motion Performance Summer 2015

Faculty Mentors: David Armstrong, PhD, DPM and Bijan Najafi, PhD, Department of Surgery

University of Arizona, Tucson, AZ

- Project: Conducted a Gait and Balance Assessment and Training Program in patients with or at risk for peripheral neuropathy using wearable sensor technology and virtual reality
- Collected exercise data using MATLAB and wearable motion sensors
- Obtained patient demographics and health history using IRB-approved surveys

SENIOR CAPSTONE PROJECT

College of Engineering Interdisciplinary Capstone, The University of Arizona, Roche Tissue Diagnostics

- Worked in a team of six senior undergraduate engineering students at the University of Arizona in collaboration with full-time engineers at Roche Tissue Diagnostics for the 2019-2020 academic year
- Project: Developed a liquid volume sensor to measure reagent volumes on the Roche HE 600 with high resolution, accuracy, and precision. The HE 600 is an instrument used for automatic hematoxylin and eosin diagnostic tissue stains, and we aimed to replace the current float sensor method with a capacitive volume sensor for monitoring reagent volumes in liquid reservoirs without making contact with the reagents.
- Contributed to the project by developing a graphical user interface in Python with PyQt for continuously reporting volumes of eight reagents in reservoirs on the HE 600

CONFERENCE PRESENTATIONS

- *Optical Coherence Tomography and Elastography for the Visualization of Architecture and Stiffness Differences in Soft- and Stiff-Conditioned Breast Tumors*, Oral presentation at the International Society for Optics and Photonics (SPIE) Photonics West, San Francisco, CA, January 2025.
- *Optical Coherence Tomography and Elastography for the Visualization of Architecture and Stiffness Differences in Gastric Cancer and Dysplasia*, Poster presented at the American Society of Clinical Oncology (ASCO) Gastrointestinal Cancers Symposium, San Francisco, CA, January 2025.
- *Optical Coherence Tomography and Elastography for the Visualization of Architecture and Stiffness Differences in Soft- and Stiff-Conditioned Breast Tumors*, Poster presented at the IEEE-EMBS International Conference on Healthcare Innovations in Point of Care Technologies (HI-POCT), Tucson, AZ, September 2024.
- *Modeling T Cell and Vascular Interactions In Vitro*, Poster presented at the Annual Biomedical Research Conference for Minority Students (ABRCMS), Anaheim, CA, November 2019.
- *Modeling T Cell and Vascular Interactions In Vitro*, Poster presented at the Biomedical Engineering Society (BMES) Annual Meeting, Philadelphia, PA, October 2019.

CONFERENCE PRESENTATIONS, CONTINUED

- *Modeling T Cell and Vascular Interactions In Vitro*, Poster presented at the Massachusetts Institute of Technology Summer Research Program Poster Session, Cambridge, Massachusetts, August 2019.
- *Paper-based Vertical Assay for Detection of Metastatic Breast Circulating Tumor Cells*, Poster presented at the Annual Biomedical Research Conference for Minority Students (ABRCMS), Indianapolis, IN, November 2018. **ABRCMS Presentation Award** earned for high presentation score.
- *Paper-based Vertical Assay for Detection of Metastatic Breast Circulating Tumor Cells*, Poster presented at the Undergraduate Research Opportunities Consortium (UROC)'s Research Conference, The University of Arizona, Tucson, AZ, August 2018.
- *Optimizing a Dihydroartemisinin Assay for the Detection of Substandard Medicines*, Poster presented at the Howard Hughes Medical Institute Annual EXROP Meeting, Chevy Chase, Maryland, May 2018.
- *Optimizing a Dihydroartemisinin Assay for the Detection of Substandard Medicines*, Poster presented at the Biomedical Engineering Society (BMES) Annual Meeting, Phoenix, AZ, October 2017.
- *Optimizing a Dihydroartemisinin Assay for the Detection of Substandard Medicines*, Poster presented at the Arizona Bioindustry Association (AZBio) Awards, Phoenix, Arizona, October 2017.
- *Efficacy of an Extracellular Matrix-Based Hydrogel as a Delivery Method for MicroRNAs*, Oral presentation at the University of California, San Diego's Summer Research Conference, San Diego, California, August 2016.

SCHOLARSHIPS, FELLOWSHIPS, HONORS, AND AWARDS

Kenneth E. and Michele L. Moore Endowed Scholarship in Optical Sciences	2024-2025
The University of Arizona Wyant College of Optical Sciences \$2,750 discretionary award	
DeMund Foundation Graduate Student Endowed Scholarship in Optical and Medical Sciences	2023-2024
The University of Arizona Wyant College of Optical Sciences Tuition and stipend for first-year studies	
National Science Foundation Graduate Research Fellowship Awarded but unable to accept	2022
BME Second Year Fellowship Duke University Tuition and stipend for second-year studies	2021-2022
Fitzpatrick Institute for Photonics (FIP) John T. Chambers Fellowship Duke University	2020-2021
\$10,000 discretionary award and \$1,000 professional travel funds	

SCHOLARSHIPS, FELLOWSHIPS, HONORS, AND AWARDS, CONTINUED

Raytheon Award for Best Overall Design (\$5,000) The University of Arizona College of Engineering Craig M. Berge Design Day	May 2020
Rincon Research Award for Best Presentation (\$1,500) The University of Arizona College of Engineering Craig M. Berge Design Day	May 2020
Global Health Competition Innovation Award The University of Arizona	October 2019
Academic Year Academic Distinction The University of Arizona	2018-2019
ABRCMS Presentation Award High presentation score at 2018 ABRCMS meeting	November 2018
Dean's List The University of Arizona 3.8 GPA for more than 14 units	Fall 2018, Spring 2019 and Fall 2019
Dean's List Honorable Mention The University of Arizona 4.0 GPA for 12-14 units	Spring 2018 and 2020
Dean's List Scripps College At least 3.67 GPA for 16+ credits	Fall 2015 and Fall 2016
Rebecca Barber Adams '61 Non-Profit Internship Grant Scripps College	February 2015
Donna Darnell '56 Scholarship Scripps College Awarded for academic achievement	December 2014

CLUBS, ORGANIZATIONS, AND VOLUNTEER EXPERIENCE

Social Chair , Optics for All (OFA) University of Arizona, Tucson, AZ	May 2024 – Present
<ul style="list-style-type: none"> Leading social events and initiatives to serve the optical sciences community, specifically providing a forum for students from underserved, underrepresented, and underinvested backgrounds 	
Pratt Liaison , Out in Science, Technology, Engineering, and Mathematics (oSTEM) Duke University, Durham, NC	March 2021 – May 2022
<ul style="list-style-type: none"> Worked as a contact point between oSTEM and the Duke Pratt School of Engineering to enhance the experience of the LGBTQ+ community in STEM graduate departments at Duke 	
Mentor , Duke FIRSTS-Duke LIFE Mentoring Program Duke University, Durham, NC	September 2020 – May 2022
<ul style="list-style-type: none"> As a first-generation graduate student, I mentored first-generation undergraduate students at Duke interested in pursuing graduate studies in biomedical engineering 	

CLUBS, ORGANIZATIONS, AND VOLUNTEER EXPERIENCE, CONTINUED

First Year Representative, Duke Optical Students Chapter (DOSC) September 2020 – May 2021
Duke University, Durham, NC

- Engaged current and incoming Duke students interested in optics with the Fitzpatrick Institute for Photonics and the Duke Optical Students Chapter through social media and outreach events

Volunteer, Molecular and Cellular Biology STEM Outreach and Recruitment January 2020 – May 2020
University of Arizona, Tucson, AZ

- Educated youth in the Tucson community about topics in molecular and cellular biology through various events, lessons and demonstrations such as DNA extraction from human cheek cells
- Engaged in virtual outreach through the development of educational videos following the COVID-19 shutdown of schools

Project Team Member, Medical Device Club August 2019 – May 2020
University of Arizona, Tucson, AZ

- Partnered with DialysFlex, Inc. to design and build a revolutionary flexible hemodialysis catheter to eliminate pain and complications caused to hemodialysis patients by traditional rigid steel access needles

The Advance Undergraduate Institute (AUI) March 14-16, 2019
Stanford University, Stanford, CA

- Participated in a three-day intensive experience at Stanford University in which students are selected to participate based on their potential and interest in pursuing a PhD in the Biosciences
- After completing the three-day institute, joined the AUI network and am engaging with previous participants who are currently pursuing and/or enrolled in a PhD and/or MD/PhD program

Scribe, Theta Tau Professional Engineering Fraternity, Chi Chapter November 2018 – December 2019
University of Arizona, Tucson, AZ

- Maintained written records for the chapter, including minutes of all chapter and Executive Council meetings
- Corresponded with regional and national officers

Head of Philanthropy Committee, Theta Tau Professional Engineering Fraternity August 2018 – May 2019
University of Arizona, Tucson, AZ

- Organized and led philanthropy events for the fraternity throughout the year to give back to the community

Student Teacher, Science Bus August 2016 – December 2016
The Claremont Colleges, Claremont, CA

- Taught local fourth and fifth grade students hands-on lessons on topics in science
