

# Canton Section - Technical Meeting Notice

**Title: An Introduction to Black Oxide process.**

**SPEAKER: Paul Bodnar, Midwest Account Manager/Technical Representative, Hubbard-Hall Inc.**

Paul has spent most of his 12 years at Hubbard Hall involved in technical chemical sales, including sales and service of specialty chemicals for metal finishing and other industrial applications. He has experience in servicing, setting up, and providing expertise in the areas of metal finishing, conversion coatings, metal cleaning, water treatment, and other aspects of surface treatment for ferrous and non-ferrous alloys. He is involved with process improvement in chemical related fields, problem

solving, and environmentally green chemical alternatives in production. His Midwest territory includes Ohio, Western PA, West Virginia, and Kentucky. Paul works with technical resources to recommend new products to fit customer needs. Paul also has sales experience from his previous roles working at Palmer Holland, Chem Central and St. Gobain. Paul received his Bachelors of Business Administration from Cleveland State University.

Hubbard Hall serves the metal finishing industry by providing aqueous cleaning/vapor degreasing, black oxide/phosphate coatings, corrosion protection/heavy & dry to touch oils, electroplating/electropolish, heat treat salts for metal and/or rubber, mass finishing/brass & copper brightening, paint & powder coat stripping, and water treatment for metal removal.

**ABSTRACT:**

This presentation will give an introduction to the conceptual understanding of Black Magic (Oxide) as a conversion coating for steel, stainless steel, and other metals as well as the process.

For more preview of the Black Magic (Oxide). Please visit:
