① Magnetic Core

This solid piece made with iron provides a changing magnetic field & allow highest voltage to the secondary coil.

② Secondary Coil

Consists of thousands of turns with thin copperwire. Secondary coil allows the +12 volt found in your vehicle to be amplified into highervoltage which provides a powerful spark in engine's combustion chamber.

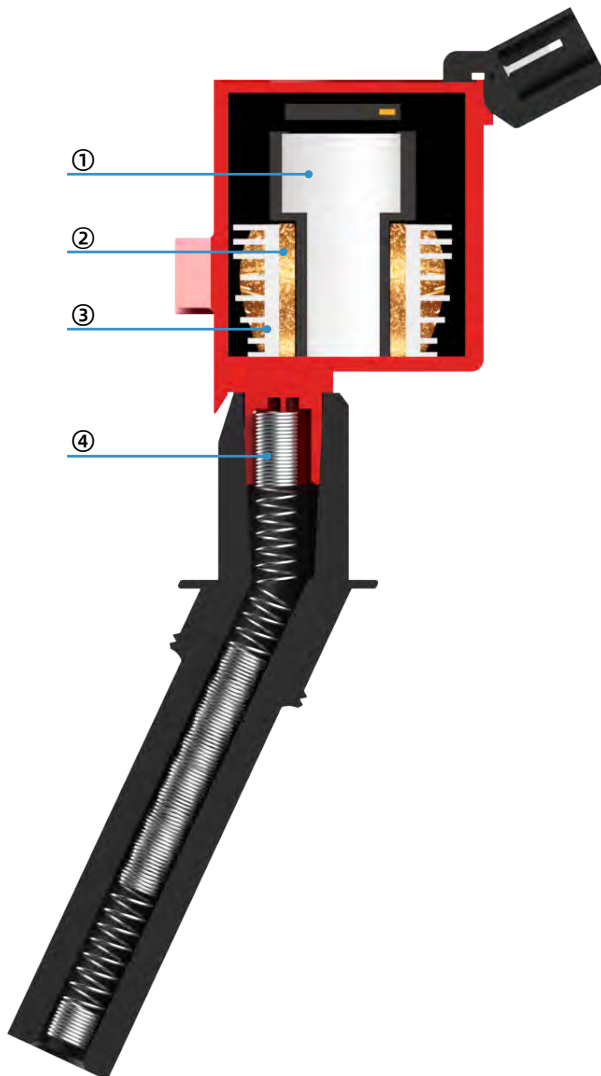

③ Primary Coil

Constructed with high quality thick copper wire and is located between an iron core & secondary coil.

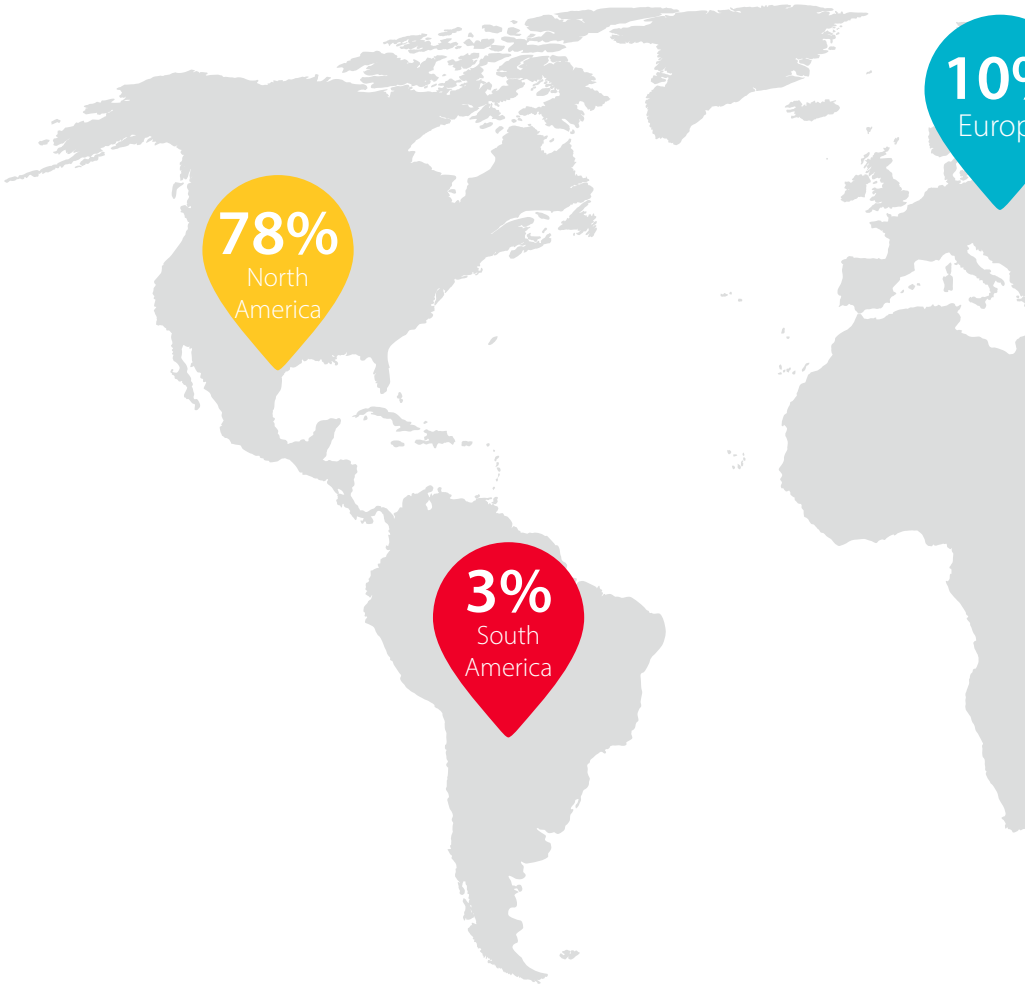

This provides the pulse needed to create a high voltage spark in the spark plug.

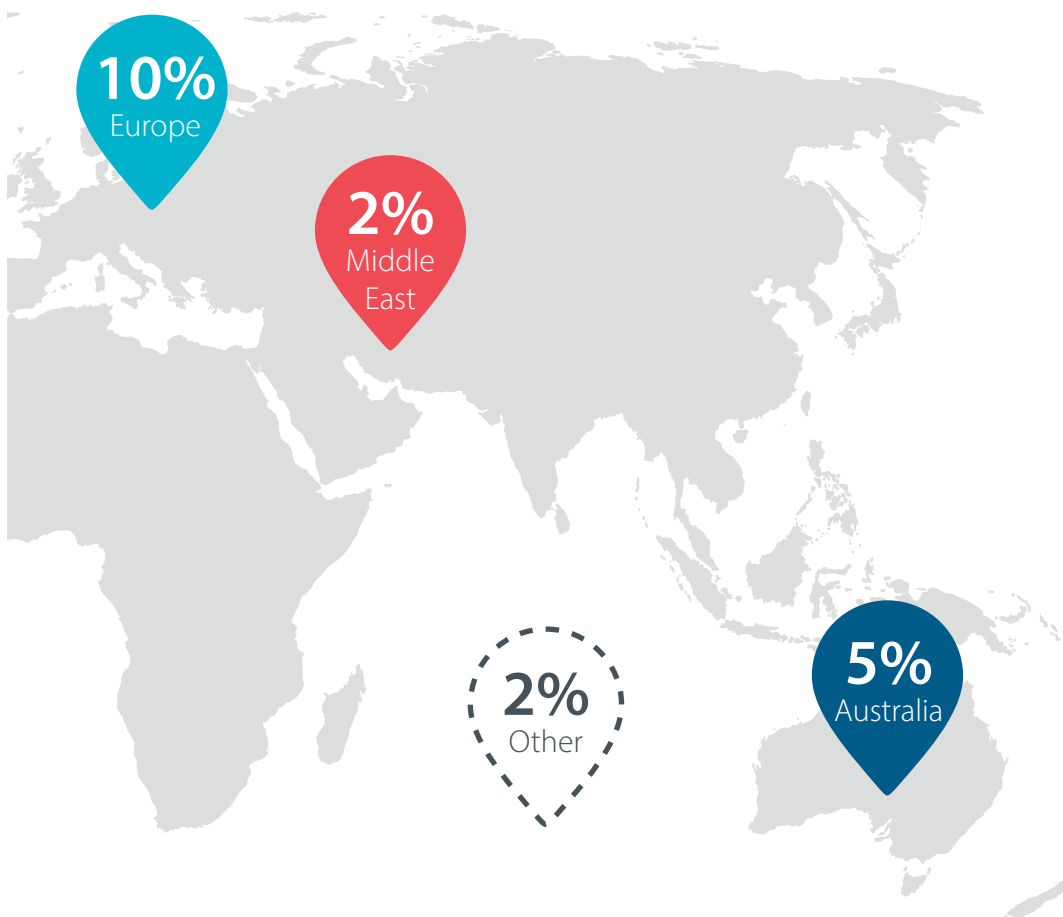

④ High Power Voltage to Spark Plug

Transfer high voltage after it is created inside of ignition to engine's spark plug.
