

ALL VOICES HEARD CORPORATE EXPERIENCE

The All Voices Heard Corporate Experience is designed to unite teams large and small through accessible music making! No musical experience needed.

Stephen Carroll leads national and international initiatives globally. He specializes in community, accessibility, inclusiveness, diversity and leadership.

How it works...

Stephen and his team attend your event and deliver a 25-45 minute experience where:

- The event is kicked off with a show-stopping number from a choir of world class singers
- They seamlessly lead attendees through an array of vocal warm-ups to break the ice. We seamlessly showcase vocal science, unveiling the main voice functions and preservation techniques for an entertaining start.
- They complete an inclusive musical experience learning a song, promoting accessibility, diversity and inclusion, incorporating sign language and Braille.
- Finally, participants deliver a full performance, emphasizing teamwork and creating an empowering musical moment resonating throughout the event.

Hear from our clients...

“When our colleagues from Europe, the Middle East and Africa, finally met up in person again post Covid, we knew it was going to be very special, and indeed it was, as we reconnected through a powerful and memorable choral moment together, that had us singing in unison, thanks to Stephen and Claddagh.”
