*"Our soul is cast into a body,
where it finds number, time, dimension."*

-Blaise Pascal

Well, my friends, Merry Christmas! I hope 2022 was a delightful year for you. As I reflect on the past 365 days, I think, as perhaps you do, of the French mathematician Blaise Pascal, and I think about the body into which my soul was cast. Here's a little about my 2022 by the numbers, time and dimension.

- 5,250: Insurance maximum out-of-pocket...met
- 900: Insurance deductible...met
- 18 feet: average length of the human digestive tract...diseased
- 17 feet: length of my digestive tract after robotic sigmoidectomy...1 foot removed
- 7: number of kidney stones bilaterally laserered into dust...peed out

On the lighter side...

- 100: miles hiked through Portugal and Spain with my friends Ken, Dolores, Kayla and Michael
- 70: hours in the air with my buddy & instructor Logan on my way to becoming a private pilot
- 2: dogs with no health issues this year...bow-wow-wow-yippee-yo-yippee-ye!
