COMPANY OVERVIEW

After decades of industry experience, the Slater family launched Central Vic Stabilising (CVS) as a full-service roadway grading, paving and sealing company, serving the whole of Victoria.

The company started with a handful of civil projects in 2018 but today, we are growing and sharing our training and experience throughout Victoria and Southern NSW.

We use state-of-the-art technologies, a fleet of specialised trucks and equipment, and the latest paving methods to serve our clients.

CVS has the personnel and the heavy machinery necessary to make any roadway surface the perfect conduit for any transportation situation. Roadway construction is a necessary and important aspect of modern Australian life.

We recycle existing road surfaces by mixing binder (e.g., cement) and crushed rock into the existing pavement to add body and strength.

OUR PURPOSE

Grading, levelling, paving, sealing, restoring...
We are Victoria's roadway specialists!

Established in 2018, Central Vic Stabilising Pty Ltd is a family-owned business located in Bendigo Victoria.

Our production team has decades of experience in road stabilising, road maintenance and construction services, and we have used our skills to faithfully serve localities across Victoria and Southern NSW.

Our clients know that it's important to maintain the roads criss-crossing their communities and they hire us to help sustain the streets of their shires, towns and cities.

After all, the public expects and should anticipate safe and smooth pathways as they move about their day.

Smooth roads may be the first thing we take for granted... but shouldn't they be the last thing we leave to chance?

OUR SERVICES

Every year, seasonal weather conditions require state and local governments to repair and replace the streets of their communities.

Heavy rains, flooding, snow, black ice, frost, bushfires and unyielding heat — Victorians endure a wide variety of weather conditions and so do our roads. These changing environmental conditions torture and degrade roadways.

Central Vic Stabilising has seen the highway trauma firsthand and has built its reputation repairing and restoring these important thoroughfares.

Our process strengthens the road surface by incorporating binders such as cement and crushed rock, increasing surface longevity.

Other services include concreting, shoulder grading, drainage and landscaping, too.

CVS is obsessed with truck maintenance. Our fleet of heavy trucks is kept in tip-top shape because our machines must be at peak performance to deliver quality work safely.

ROAD STABILISING

Our stabilisation process utilises binding agents to strengthen and prime the road surface, leading to increased structural integrity, greater resistance to wear and improved longevity.

ROADWAY REHABILITATION & WIDENING

Rehabilitations and new constructions are part of our specialty; road widening, culvert works, and pavement upgrades are just a sample of what we can achieve.

WET HIRE SERVICE

Our wet hire service offers graders, skid steers, rollers, bobcats with extensive attachments, tipper trucks and prime movers with low loaders. All equipment is operated by experienced professionals for efficient project delivery.

GENERAL & BULK EARTHWORKS EXPERTISE

We deliver comprehensive earthmoving solutions, including site preparation, excavation and bulk earthworks, tailored to support civil, infrastructure and industrial projects with precision and efficiency.

SPECIALIST TRANSPORT & HAULAGE SERVICES

We provide reliable transport solutions, including low loader and bitumen haulage, ensuring safe and efficient delivery of heavy machinery and materials to project sites across Victoria.

ASPHALTING & SPRAY SEALING

We utilise high-grade materials for asphaltting and spray sealing. We lay, level and compact the mix, delivering durable and long-lasting surfaces for roads, driveways, and car parks.

QUARRY OPERATIONS & MATERIAL SUPPLY

Our team specialises in high-quality quarry works, from material extraction to supply, ensuring access to premium resources for construction, stabilisation and infrastructure projects.

CLIENTS

Central Vic Stabilising clients include the state and local governments from across south and central Victoria.
