Jefferson County Pct. 1 Road & Bridge is here to help you when installing a new culvert or replacing an old one. We will inform you of the correct size and type needed.

**Material List for:**

- Installing New Driveway**
- Installing Add-ons to Existing Driveways**

<b>Culvert:</b>	<b>Size:</b>	<b>Quantity:</b>
<input type="checkbox"/> <b>Plastic</b>	_____	_____

- Jefferson County provides the labor and fill dirt needed for installation of a culvert at no cost.
- The culvert must be purchased by the homeowner and onsite before installation begins.
- If the homeowner wants extra material over their culvert it must be purchased and onsite before installation.
- During construction, to protect your new culvert, we recommend that you cover your newly installed culvert with mats, heavy plywood, or something to distribute weight until material has had time to settle. This should help prevent your culverts from being damaged.
- Any relocation of a culvert will have a minimum charge of \$400.00 and is the responsibility of the homeowner.
- Concrete driveway foundation framing must be inspected by Jefferson County Pct. #1 Road & Bridge before concrete is poured over culverts.

I have read and understand the procedure above.
