

City of Bevil Oaks

Service Agreement

- 1. Purpose:** The City of Bevil Oaks is responsible for protecting the drinking water supply from contaminating or pollution which could result from improper private water distribution system construction or configuration. The purpose of the service agreement is to notify each customer of the restrictions which are in place to provide this protection. The utility enforces these restrictions to ensure the public health and welfare. Each customer must sign this agreement before the City of Bevil Oaks will begin service. In addition, when service to an existing connection has been suspended or terminated, the water system will not re-establish service unless it has a signed copy of this agreement.

- 2. Restrictions:** The following unacceptable practices are prohibited by State regulations.
 - a) No direct or indirect connection between the public drinking water supply and a potential source of contamination exists. Potential sources of contamination are isolated from the public water system by an air gap or an appropriate backflow prevention assembly in accordance with Commission regulations.
 - b) No cross-connection between the public drinking water supply and a private water system exists. Where an actual air gap is not maintained between the public water supply and a private water supply, an approved reduced pressure principal backflow prevention assembly is properly installed.
 - c) No connection exists which would allow the return of water used for condensing, cooling or industrial processes back to the public water supply.
 - d) No pipe or pipe fitting which contains more than 8.0% lead exists in private water distribution facilities installed on or after July 1, 1988, and prior to January 4, 2014.
 - e) Plumbing installed on or after January 4, 2014, bears the expected labeling indicating $\leq 0.25\%$ lead content. If not properly labeled, please provide written comment.
 - f) No solder or flux which contains more than 0.2% lead exists in private water distribution facilities installed on or after July 1, 1988.

- 3. Service Agreement:** The following are the terms of the service agreement between the City of Bevil Oaks (the water system) and (the customer).
 - a) The water system will maintain a copy of this agreement as long as the customer and or the premises are connected to the water system.
 - b) The customer shall allow his/her property to be inspected for possible cross-connections and other potential contaminating hazards. The inspections shall be conducted by the Water System or it's designated agent prior to initiating new water service; when there is a reason to believe that cross-connections or other potential contamination hazards exist: or after any major changes to the private water distribution facilities. The inspections shall be conducted during the water systems normal business hours.
 - c) The water system shall notify the customer in writing of any cross-connection or other potential contamination hazard which has been identified during the initial inspection or the periods re-inspected.
 - d) The customer shall immediately remove or adequately isolate any potential cross-connections or other potential contamination hazards on his/her premises.
 - e) The customer shall at his/her expense, properly install, test and maintain any backflow prevention device required by the water system. Copies of all testing and maintenance records shall be provided to the water system.

- 4. Enforcement:** If the customer fails to comply with the terms of the Service Agreement, the water system shall, at its option terminate service or properly install, test and maintain an appropriate backflow prevention device at the service connection. Any expense associated with the enforcement of this agreement shall be billed to the customer.
