Common renovation activities like sanding, cutting, and demolition can create hazardous lead dust and chips by distributing lead-based paint in pre-1978 construction, which can be harmful to adults and children. To protect against the risk, EPA issued this new rule on April 22, 2008, which requires the use of lead-safe work practices and other actions aimed by preventing lead poisoning. **I understand that I must comply with ENVIRONMENTAL PROTECTION AGENCY 40 CFR Part 745 (EPA-HQ-OPPT-2005-0049; FRL-8355-7) RIN-2070-AC83 Lead; Renovation, Repair, and Painting Program, on all pre-1978 residential construction.**
