

What is NaPro Technology?

NaPro Technology is a medical & surgical speciality in which a provider undergoes an unique training program to learn how to interpret "biomarkers" of a woman's menstrual cycle in order to diagnose and treat many common gynecological problems, naturally.

Conditions We Treat

- Infertility
 - Recurrent miscarriage
 - Polycystic Ovarian Syndrome
 - Endometriosis
 - Abnormal Uterine Bleeding
 - Primary Amenorrhea
 - Functional Hypothalamic Amenorrhea
 - Premenstrual Syndrome (PMS)
 - Postpartum Depression
 - Chronic Pelvic Pain
 - Ovarian Cysts
 - Perimenopause/Menopause
 - Osteoporosis
 - **Progesterone Support in Pregnancy
- **Offered by Sharon only through

What is the Creighton Model System (CrMS)?

NaPro Technology services go hand-in-hand with the Creighton Model System (CrMS) of menstrual charting.

NaPro providers are trained to recognize "biomarkers" which help to adequately diagnose and treat many common underlying gynecological conditions.

The biomarkers also tell the couple when they are fertile and infertile, allowing them to use the Creighton Model System to either achieve a pregnancy or to avoid a pregnancy when necessary.

Over 30 years of research has been done at the St. Paul VI Institute in Omaha, Nebraska by Dr. Thomas Hilgers, MD.

CrMS is the cornerstone of NaPro Technology.

Fertility Care Practitioners who teach charting:

Marie DiCecco, MS, CFCP
Call/Text: 610-202-4751

Emily Parrish, RN, BSN, CFCP
Call/Text: 267-897-3891

Liz Parrish, RN, BSN, CFCP
Call/Text: 267-221-1185

Marcia Niznan, CFCP
Calls only: 610-789-4547

Helen LaFrance,, PA, CFCP
Call only: 610-436-8323

Kaitlin McCann, PA-C, FCPI
