

WHY PRECISION HEALTHCARE TECHNOLOGIES FOR **GENERATIVE AI & HEALTH/WELLNESS APPS?**

Both the problem and the opportunity in your sector is that you do not have access to actionable and functional data that connects your brilliant technologies to anything truly valuable. **We fix that and give you a powerful market differentiator overnight!**

The Elusive Goal is Achieved – Consumer Control of Their Own Health Records Means True Access, Options, Pricing & Connection!

Now We Need Your Support & We're Paying You for It!

Three Reasons We Need to Connect TODAY!

- 1 At a recent lunch, the head of Google Cloud Healthcare told me that without Precision, Generative AI for Workflow is like Google Maps without a destination. You're going nowhere really fast.
- 2 Not only that, but Precision's efforts also provide the revenue to your client with no cost or operational changes so they can now afford to pay for these great Generative AI services.
- 3 The same with Health/Wellness apps. If you are not being connected to actual purposeful access, then the product itself is useless.

BACKGROUND

Since 2007 Precision has helped to architect and build value-based measurement and management platforms with CMS/Payers. These algorithms are not in any EHR or dataset, and the only master structure for all payers resides within Precision's platforms.

- We have current and updated CMS/Payer compliance and quality measures data on 1,061,000 providers and can tell them to the dollar what revenue they are being penalized for not taking.
- They keep 100% of this missed compliance-based revenue as we are compensated separately for our AI triage, care coordination and navigation codes.
- Since we are already present and connecting 17 sectors of healthcare and consumer health worldwide, we are your perfect advocate and partner.

Results? - The very same system that was built to penalize organizations and providers can correct their path in the background with their own rules without any operational changes required. There is no new technology to learn, no upfront or out-of-pocket costs, and a profit is guaranteed. [More information here.](#)

NOTE

To be clear, we ourselves do not need development services as we have spent 18 years building out own proprietary technology. The fastest way to make real revenue with us and give the client the money to pay for your services is to connect them to Precision. We pay you when they use us and it costs nothing for them to use us. Thank you!

- Hospitals, Organizations & Providers - Click to see three things we do for providers, their staff, and their patients that no other technology can do.
- How & Why Have These Corporate Giants Been Critical to Our Success? - When you realign the incentives and benefits while truly helping to simplify the lives of providers, staff and patients, you find out just how great these corporate citizens are.
- How Exactly do We Benefit & Connect All Our Strategic Partners Together - Most products and services cover only a subset of the patient population whereas we engage and monetize all patients and then have our partners in other sectors share in revenue together when we use each other's services.

What Are Our Biggest Opportunities Together?

- 1 Missed compliance mandated services where medical necessity was found and the provider failed to act. [For more please see this link.](#)
- 2 About 30% of these are within the practice and 70% need to be connected to other services or facilities.
- 3 Transitional Care Management (TCM) is where hospital readmissions are the biggest and most preventable pain points.
- 4 Though typical reimbursements for TCM pay between \$205 and \$265, these hospitals don't have their workflow together at the time of discharge which results in only 3.1% of patients getting this crucial service. One highly successful hospital hits 7>3% and is still missing \$25+ million dollars and getting decimated on hospital readmission charges.
- 5 The tops of the medical necessity and TCM funnels need to be directed by Precision and connected by you!

Thank you again for your time and patience in understanding our mission.

Let's connect and see what we can build together.
