

**PRECISION**  
HEALTHCARE TECHNOLOGY

# INTRODUCTION TO HEALTHCARE ORGANIZATIONS & PROVIDERS

# ABOUT PRECISION'S ONE-OF-A-KIND AI DRIVEN HEALTHCARE TECHNOLOGY

In the next few minutes, you will get answers to 90%+ of your questions, and save us an hour in explanations.

No upfront cost, no new technology to learn, no new staff responsibilities, launch in 72 hours, cashflow in 35 days, nothing paid until you are paid, and we can even bill and collect on your behalf at no charge. For large organizations we do onboarding and implementation for you. Per 100 patients engaged, you should expect to receive \$12,100 in billable value for our services for \$2,000. ACO/Medicare Advantage Programs are FREE!

It's ironic that in such a volatile industry as healthcare, where regulations, compliance standards, and reimbursements are frequently changed and often without notice, that the bureaucratic styles that run many of these organizations are slow to act, suffer from paralysis by analysis and are downright averse to change.

This does nothing to help the providers or the patients who desperately need our help in making their process easier. Our program does everything for you, and your organization is required to do nothing. Even the largest organizations are up and running in 30 days with little or no responsibilities.

Covid taught us that patients will engage virtually. Since that time, they have shifted that preference to electronic communication to avoid or delay virtual or live visits. Though you are likely doing more of this, it is unlikely that you are maximizing the compliance, triage, and care coordination value that drives revenue. It's even more certain that you are not monetizing these efforts properly. We can turn that around together today! Thank you in advance!

## PRIMARY BENEFICIARIES

Hospital/Health Systems, Physician and Multispecialty Groups, ACOs, Medicare Advantage, IPAs, etc.

## SECONDARY BENEFICIARIES

Payers, Benefits Managers, TPAs, Self-Insured Companies, etc.

### In this short summary you will see links to;

- [Two Minute Overview](#) - There are 600+ EMR systems and none can do what we do, yet we can work with or within them all.
- [Case Studies](#) - Actual billing claim run and results of 20 Pilot programs representing organizations with 1.3 million patients.
- [Precision Process Outline](#) - Exact steps in order and who does what. HINT - We do everything!
- [QuickStart](#) - Launch in 72 hours, the provider part takes 10 minutes, office workflow and responsibilities do not change. You never even login into our system, and we can transfer into your EMR and submit to your billing process. Your staff does nothing.
- [ACOs/Medicare Advantage](#) - All Shared Risk programs have these exact same services for free, and for the first time, earn revenue on the fee for service side.
