

HEALTH 2.0 CONFERENCE · APRIL 2026

Building the Invisible Infrastructure of Modern Healthcare

Precision Healthcare Technologies

Doug Sparks · Founder & CEO

Healthcare is failing on three fronts simultaneously.

140M+

Americans uninsured
or underinsured

\$1T+

In compliance-linked
revenue at risk annually

6+

Disconnected systems
the average patient navigates

These are not isolated failures. They share a single structural root cause.

Three critical markets. None of them connected.

CMS & Payer Compliance Intelligence

Regulation lives outside clinical systems.
Providers never see their compliance
exposure — until the penalty arrives.

Workflow & Care Navigation

AI tools are being layered onto broken
workflows. They add complexity instead
of removing it. The friction multiplies.

Consumer Health Record Control

Patients are locked out of their own data.
Portals exist but don't connect. Records
don't travel with the patient.

THE EVIDENCE

What the numbers actually show.

One physician. One year. Real data.

DR. ZHIVAGO

LOCATION	SPECIALTY	ENTITY TYPE	NPI NUMBER
3901 Nostrand Ave Suite L11, Brooklyn, NY, 11235	Internal Medicine	Individual	1124198304

Risk Score 1.1206	Total Beneficiaries 536	Total Services 6023	Missed QM Opportunity \$333,901.00	EKG Opportunity \$30,495.00
ABI Opportunity \$10,938.00	AWV Opportunity \$74,560.00	MH Opportunity \$22,896.00	RPM \$65,606.40	CCM \$20,868.81

Sr. No.	Quality measures	QM Reported (%)	QM Not Reported (%)	QM Cost (\$)	QM Missed Opportunity cost (\$)
1	Atrial fibrillation	54(10%)	482(90%)	\$ 81	\$39,042.00
2	Alzheimer	70(13%)	466(87%)	\$ 160	\$74,560.00
3	Asthma	32(6%)	504(94%)	\$ 19	\$9,576.00
4	Cancer	70(13%)	466(87%)	\$ 20	\$9,320.00
5	Congestive Heart Failure	75(14%)	461(86%)	\$ 68	\$31,348.00
6	Chronic Kidney Disease	118(22%)	418(78%)	\$ 60	\$25,080.00
7	COPD	64(12%)	472(88%)	\$ 43	\$20,296.00
8	Depression	59(11%)	477(89%)	\$ 48	\$22,896.00
9	Diabetes	139(26%)	397(74%)	\$ 48	\$19,056.00
10	Hyperlipidemia	338(63%)	198(37%)	\$ 11	\$2,178.00
11	Hypertension	348(65%)	188(35%)	\$ 15	\$2,820.00
12	Ischemic heart disease	182(34%)	354(66%)	\$ 62	\$21,948.00
13	Osteoporosis	54(10%)	482(90%)	\$ 17	\$8,194.00

\$333,901

in missed compliance-mandated care
One physician · One year

\$352 Compliant provider reimbursement rate	\$179 Non-compliant provider reimbursement rate	~50% Revenue lost to non-compliance
----------------------------------------------------------	-----------------------------------------------------------------	--------------------------------------------------

You never see this number. We do — because we built the system that generates it.

The market tried. None of the solutions connected.

Big Tech

- Built record platforms disconnected from care decisions
- No integration with clinical or compliance logic
- Billions spent — adoption never scaled to impact

AI Point Tools

- Layered onto broken workflows without fixing the structure
- Improved one metric while disrupting three others
- Generated insight without generating action

Consumer Apps

- Disconnected from provider incentives and payment systems
- Siloed from the compliance logic that governs care
- Records stayed fragmented — patients carry the burden

THE SOLUTION

We built the layer that connects all three.

Invisible. Embedded. Systemic.

 Compliance Intelligence

 Workflow Navigation

 Consumer Access

Precision Stealth Workflow Intelligence

PRECISION STEALTH WORKFLOW INTELLIGENCE

Translates payer ruleset logic into live care decisions at the point of service

Operates across CMS and commercial payer standards — Medicare Advantage, ACOs, and more

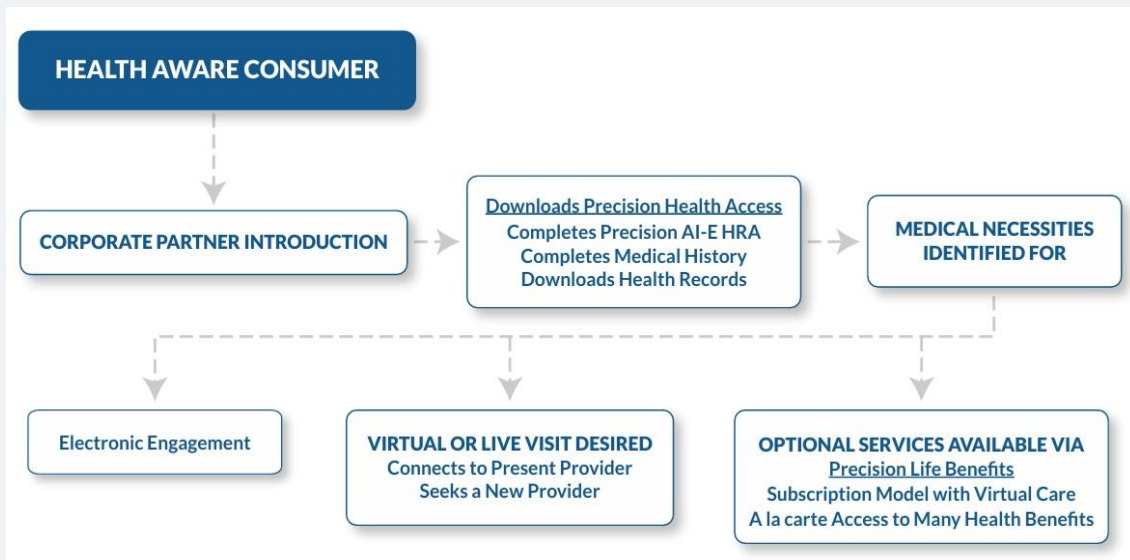

No EHR replacement required — embeds in existing workflows without disruption

Aligns clinical, financial, and compliance logic simultaneously in real time

The consumer pathway — from awareness to coordinated care.

Record Control

Patients download, manage, and share their complete health record — connected to care decisions in real time.

Care Navigation

System identifies medical necessities and routes to the right provider, visit type, and payment pathway.

Payment Flexibility

Cash, subscription, insurance, or mixed — patient chooses. Provider receives correct reimbursement regardless.

Solving the 140 million person access gap.

140M+

Americans uninsured
or underinsured —
not because healthcare
doesn't exist, but because
access is structurally broken.

Cash Pay

Transparent pricing, physician-led, no surprise billing

Subscription

Family & household shared-visit model — a fraction of insurance cost

Insurance

Full compatibility with existing plans — no system replacement

20 healthcare sectors. One unified data layer.

Unified flow without centralization.

Interoperability without disruption.

Independent of any EHR vendor.

PRECISION LAYER

Primary Care

Specialty Care

Mental Health

Pharmacy

Home Health

Urgent Care

Telehealth

ACOs

Medicare
Advantage

Health Systems

Value-Based
Orgs

Consumers

My Health Youniverse

The consumer face of the Precision infrastructure layer.

My Health Records

Secure, shareable, always accessible. Complete history in one place — controlled entirely by the patient.

Virtual Care Access

Board-certified physicians 24/7. No waiting rooms. No referral friction. Physician-led care on demand.

Pharmacy Connected

Medication history, refills, and care coordination linked to your trusted pharmacy network — already integrated.

HIPAA by Design

Data is never sold. Never shared without explicit authorization. Privacy is architecture, not a checkbox.

Three outcomes. Delivered at the same time.

Improved Outcomes

- Quality measures reported accurately and on time
- Medical necessities identified and acted on
- Patient care continuity across all providers

Reduced Compliance Risk

- Penalty exposure surfaced before claims go out
- Payer grading standards applied in real time
- Revenue durability built in — not audited after the fact

Maximized Revenue Capture

- Missed care opportunities recovered before close
- Correct reimbursement rates maintained
- New revenue streams via consumer access layer

Not a point solution.

Not a marketplace.

A new operating layer.

✗ Point solutions fix one metric
and break three others

✓ Precision improves all three layers
simultaneously

✗ Marketplaces create new intermediaries
without fixing the underlying logic

✓ Precision eliminates friction at
the infrastructure level

✗ Technology layers add burden
to existing workflows

✓ Precision embeds invisibly —
providers don't change how they work

THE FUTURE OF HEALTHCARE

Invisible intelligence. Aligned incentives. Affordable, compliant care.

Compliance becomes automatic

Care becomes navigable

Control returns to consumers
