

# Scanning Information

**Communication is everything** and we want to help! We had been asked about what is needed for scans and decided to send this to all offices so that as a team we are always working together.

**Time is valuable** for you and your patients and we always want to ensure the initial patient visit covers everything we may need for your case.

**We cannot emphasize enough on how important a scan is prior to reduction to recreate optimal function and esthetics.** PRE-OP scans “REGARDLESS OF THE CONDITION OF THE TOOTH” saved as iRecords can be sent before numbing in order to catch the correct bite and help in the smile design of the restorations. If a diagnostic treatment was done and there weren't any adjustments, that can be used, otherwise, it is always best to rescan.  
**(Always great to have iRecords for your offices)**

**\*\*Depending on the software you are using, some allow you to attach photos \*\***

## How to Find Us: We Accept All 3D Scans!

If using iTero, please use our lab number: 25311

For all other scans, you are able to search us by using our email, Colonialdental@gmail.com!

We have compiled a checklist below to help that moving forward cases will move forward without disruption.

## FOR FRIENDLY REMINDERS, PLEASE CUT AND PLACE IN OPERATORIES

- ☐ Pre Op Scan/Temp Scan/Models
- ☐ Photos (All Anteriors)
- ☐ Stump shade (All Anteriors)
- ☐ X-ray for implants
