6. How you can help

1) Where we started

April 5th, 2023, Big Rapids

Brandi Sweet
Advocacy Director

Marjorie Steele
Founder & Director

Larry Finkbeiner
Agricultural Director

Jess Sharp
Community Director

EDRA of MI

A 501(c)4 organization formed in June of 2023 in order to:

- fight toxic development,
- lobby on behalf of grassroots communities for economic and environmental justice, and
- model community-based economic development in underprivileged communities

Vision

We envision a community free from township, county, and state corruption, in which economic developments are designed, vetted, and voted upon by the people they impact—not distant regulatory agencies and special interest conglomerates.

A world where seventh generation organic farmers are held in the highest respect, and folk live here because they choose to—because they've fallen in love with the woods and the water.

TUEBOR

I WILL DEFEND

**Defending agriculture, free living, and the
Earth's last wild spaces.**

At the heart of the Michigan flag lies a scene celebrating Michigan's clear waters, green land, and self-sufficiency. Above this scene is the Latin word "tuebor," which means "I will defend".

In our logo, we've replaced the rifle with a book, representing our mission to fight injustice with education, research, and our constitutional rights.

Initial communities:

1. Big Rapids (Gotion)
 2. Marshall (Ford/CATL)
 3. Mundy Township (Advanced Manufacturing District)
 4. Eagle Township (Michigan Manufacturing Innovation Center)
-

2) What we've done

(from June 2023 to December 2024)

- A. Press releases & media work
- B. Legal efforts
- C. Legislative lobbying & regulatory accountability
- D. Advocacy for specific communities
- E. Rallies & events
- F. Digital footprint
- G. The Regenerative Agriculture Megasite

A) Press releases & media work

Published:

- 29 press releases
 - 17 news & research articles
 - 14 op-eds
- Developed a media list of 300+ local, state, and national media contacts
 - Established ourselves as a reliable source for journalists at key statewide publications
 - Worked with national & international publications to guide accurate coverage
 - Broke stories of environmental violation
 - Provided video interviews on local, national, and independent statewide outlets
 - Have been quoted by countless media outlets

Media highlights

- Thorough coverage of the Committee for Marshall - Not the Megasite's fight against developer MAEDA in Michigan Court of Appeals
- Breaking news of MAEDA's polluting the Kalamazoo River in Marshall summer of 2024
- Successful FOIA & publishing of Gotion's Site Plan Application April 2024

We've been quoted by:

- Huffington Post
- Rest of World
- Fox Business
- Fox & Friends
- Michigan Public Radio
- Mlive
- Bridge Michigan
- Crains Detroit
- Michigan News Source
- Dave Bondy
- local newspapers & TV stations in Big Rapids, Marshall, and Mundy Township
- and many, many more

Media connections

Our list of 300+ media contacts includes TV, radio, print, and digital publications ranging from local to international.

Journalists reach out to us 3-4 times a month, on average.

Roughly 50% of them end up publishing stories.

Roughly 10% of those stories are any good.

We've established close working relationships with many statewide journalists, at key publications.

Nonprofit & environmental allies

Gaining the trust of environmental organizations in the current political climate has been a slow, uphill journey, so we're proud to have built friendships with:

- Michigan Citizens for Water Conservation
- Protect the Porkies
- Michigan People's Water Board Coalition

B) Legal efforts

research & outreach

- Solicited legal representation from 24+ nonprofit environmental law firms, from local to international
- Developed a legal executive summary on Gotion as a reference for tribes and attorneys
- Delivered the summary to Gun Lake Band of Potawatomi, Little River Band of Ottawa, and the Saginaw Chippewa Indian Tribes of Michigan
- Prepared language for an EPA demand letter re: Gotion for the firm of Eckland & Blando

Then...we stopped trying to get a lawyer.

Because:

- none of the nonprofit environmental firms will help
- the for profit ones require us to raise gobs of \$\$\$
- raising \$\$\$ attracts parasites and profiteers
- we found cheaper, more efficient ways to get results

C) Legislative lobbying & regulatory accountability

lobbying,
education, &
grassroots
action

- Nine calls to grassroots action over statewide issues
- Five action campaigns on environmental regulation with EGLE & the EPA
- Four letters of demand to local and state environmental regulators
- Five afternoons of boots-on-the-ground lobbying in Lansing
- 18+ public comments at MEDC meetings (virtually and in person)
- 12+ EGLE & MPSC public input sessions attended virtually and in person
- One formal reply from EGLE

Letters of Demand

To the EPA, EGLE, and local county officials

1. Jan 16 2024 - EPA Demand Letter: **Gotion Must Be Red Filed NOW**
2. April 3 2024 - **Flood Impact Study Shows Gotion's Serious Environmental Risks**
3. April 24 2024 - **Gotion's FOIAed Site Plan Application: gaps & inadequacies**
4. Sept 9 2024 - Demand Letter to EGLE Re: **Marshall Megasite Water Violations**

Legislative lobbying campaigns

- No 2024 budget until no Gotion (fall 2023)
- Recall canvassing for Green Charter Township board (fall 2023)
- Lobbying for Water Affordability Bills (spring & fall 2024)
- Opposing PA 233 / restoring local zoning for wind/solar/BESS (fall 2024 to present)
- Opposing data center tax break bills (fall 2024)
- Protect the Porkies / opposing Copperwood Mine (summer & fall 2024)
- Lame duck lobbying for/against multiple bills (December 2024)

Participation in regulatory public input

OBJECTIVES

OBJECTIVES OF THE MI HEALTHY CLIMATE PLAN

- MI Potash Co, Evart (potash mining) - EGLE air & wetlands permits
- Copperwood Mine, Gogebic County (copper mining) - EGLE air & wetlands permits
- EGLE MI Healthy Climate public input sessions (in-person & virtual)
- MPSC public input session re: PA 233

EGLE responds to our Marshall demand letter

This means our demands were close to the mark.

STATE OF MICHIGAN
DEPARTMENT OF
ENVIRONMENT, GREAT LAKES, AND ENERGY
LANSING

September 23, 2024

VIA EMAIL

Marjorie Steele, Founder & Chair
Economic Development Responsibility Alliance of Michigan

Dear Marjorie Steele:

SUBJECT: Marshall Megasite Mass Grading-Calhoun

Thank you for your letter of September 9, 2024, regarding the Marshall Megasite Mass Grading-Calhoun. The Michigan Department of Environment, Great Lakes, and Energy (EGLE) is committed to working with the Marshall Area Economic Development Authority (MAEDA) to return the site to compliance. Each of your requested actions is addressed below. Your organization's requests are in **bold** font, with responses from EGLE in non-bold font.

- 1) **Re-evaluate the determination issued on January 19th, 2024 that neither Part 301 nor 303 [Part 301, Inland Lakes and Streams, and Part 303, Wetlands Protection, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended] permits are required for the project (submission #: HPS-ME3J-PHS7F), considering the impact the project has had already this summer.**

The determination letter dated January 19, 2024, was responsive to the very specific project plans and information provided with the application at that time and would not apply to subsequent modifications to the project. EGLE staff are in communication with representatives for the project and are evaluating the latest plans independently for regulatory authority, which may then lead to additional permitting requirements or compliance steps.

- 2) **Calculate the cleanup and impact costs of the environmental damage to the wetlands and Kalamazoo watershed caused by MAEDA's project to date, and take necessary action to hold MAEDA financially accountable for cleanup costs and compensating watershed stakeholders.**

As you are aware, storm water discharged from the Marshall Megasite contained suspended sediment on multiple occasions. When EGLE staff conducted the most recent site inspection on August 6, 2024, the depth of sediment deposited in the on-site wetlands was minimal. This is not to say that the amount of sediment which left the site was insignificant. EGLE staff take the impact of sediment from the Marshall Megasite very seriously, and we are working on

D) Advocacy for specific communities

advocacy & education

1. Big Rapids / Green Charter Township (Gotion)
2. Marshall (Ford Blue Oval / CATL)
3. Mundy Township (Advanced Manufacturing District)
4. Eagle Township (Michigan Manufacturing Innovation Campus)
5. Vernon Township (unknown megasite)
6. Plymouth Township (Northville Downs)
7. Groveland Township (BESS by Vesper Energy)
8. Columbia Township (BESS by Vesper Energy)
9. Detroit (Detroiters for Tax Justice)
10. Gogebic County, UP (Copperwood Mine)
11. Evart (MI Potash Co.)
12. utility-scale wind & solar (statewide)

Our community advocacy formula:

1. communities reach out for help
2. discovery with local grassroots
3. primary research & writing
4. publish resources (website, newsletter, social media)
5. press releases & media coverage (as needed)
6. local & state media interviews (as requested)
7. rinse, repeat

G) Regenerative Agriculture Megasite Model

an alternative model for
large-scale economic
development

- giving investors and developers a project communities can say “yes” to
- model based on our research with grassroots communities across the state
- 45 page “Case for Regenerative Agriculture Megasites in Michigan” is prepared in the form of a **federal grant template**, with over 80 citations including primary scientific sources
- **30 page Business Plan** outlines project scope, phases, organizational structure, and initial budgets

What is a Regenerative Agriculture Megasite?

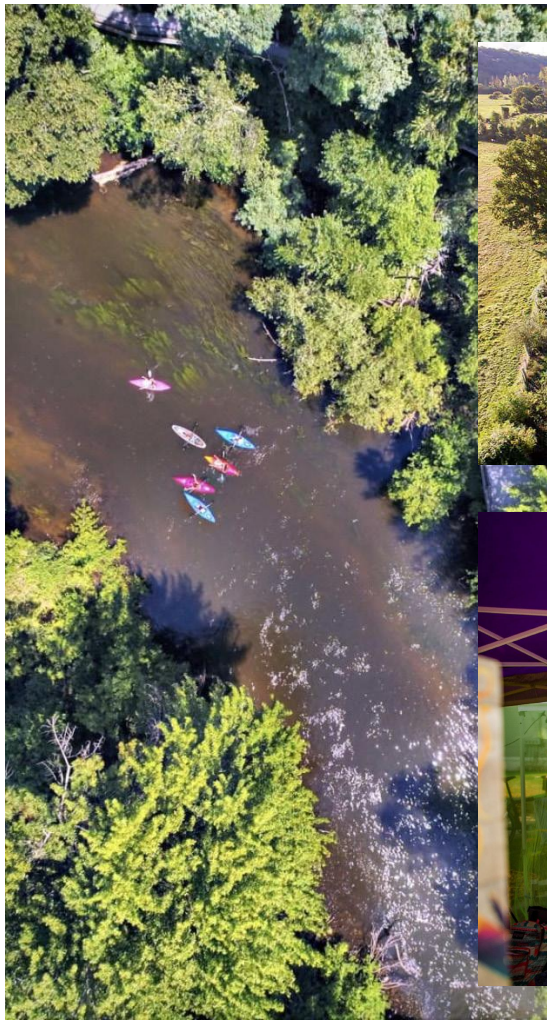

1) Food & Fiber Hub

Bridges the gap between local growers and local consumers by providing agricultural processing, packaging, and distribution. Consumers pay less, and farmers get paid more.

2) New Farm School

A permaculture farm & habitat resource for all local students, scaling up to a full public K-12 Montessori school, as needed by the community.

3) Native Habitat Park

500+ acres restored to native ecologies, routed with paths accessible to the public. Preserves biodiversity while attracting recreation tourism.

4) Made in MI Retail Corridor

A retail corridor which wraps around the site, emphasizing Michigan made products which compliment the local agricultural economy.

Stakeholder input report

3) Impact of our work

(from June 2023 to December 2024)

- A. Direct successes
- B. Indirect successes
- C. Media & political landscape

A) Direct successes

- Gotion finally announced they're halting permitting work in March 2025. They've been in default of their \$175M SSRP grant for over five months due to inactivity.
- Mecosta County & Big Rapids leaders have formally and informally revoked support for Gotion.
- Marshall megasite developer MAEDA received formal censure and fines for environmental contamination summer of 2024.
- EGLE rejected MI Potash Co's wetlands permits, spring of 2025.
- During EGLE MI Healthy Climate virtual public input sessions fall 2024, Michigan League of Conservation Voters lobbyists for Whitmer's toxic "green" energy campaign specifically attacked EDRA of MI's talking points.
- MEDC's executive and MSF boards have been hemorrhaging members; they struggled to reach quorum multiple times fall of 2024.

NEWS

Gotion Battery Plant in Limbo: Small-Town Michigan Stalls Big Green Deal

BY J.P. ISBELL
APRIL 3, 2025

IMAGE CREDIT: 13 ON YOUR SIDE VIDEO SCREENSHOT

MECOSTA COUNTY, Mich. (Michigan News Source) – The controversial Chinese-linked Gotion Inc. electric vehicle battery plant proposed for Mecosta County is in a deep freeze – not from Michigan’s lingering winter, but from mounting legal battles and fierce local opposition.

Legal limbo.

Plans for Gotion Inc.’s \$2.4 billion project hit the pause button on its permit application with the Michigan Department of Environment, Great Lakes, and Energy (EGLE) while its legal battle with Green Charter Township plays out in the U.S. Sixth Circuit Court of Appeals with oral arguments set for May 6th.

C) Changes in the larger conversation

- Environmental concerns about these projects are finally being acknowledged, in media and political talking points
- Local township & county boards increasingly understand that these megasite and energy development projects are radioactive
- Federal energy policies are giving lip service towards curbing toxic wind/solar development
- Local Michigan communities fighting toxic development are aware of each other, and support each other
- The MEDC is facing greater scrutiny from lawmakers, the public, and private partners.

Controversy Swirls Around Michigan Megasites as Critics Ramp Up Opposition

Criminal Complaints Lodged Against Governor Whitmer and Other Partners for Their Dealings with the Gotion and CATL/Ford Developments

BY J.P. ISBELL
MAY 10, 2024

LANSING, Mich. (Michigan News Source) — Larry Finkbeiner, a community organizer and farmer residing in Green Charter Township in Paris, has submitted an [affidavit](#) alleging criminal misconduct to the Michigan State Police and Attorney General, targeting several individuals associated with the development of the China-linked Gotion EV battery plant in Mecosta County. This comes less than a month after Marshall resident Barrv Wayne Adams submitted a similar complaint.

‘Green Grab’: Solar and Wind Boom Sparks Conflicts on Land Use

Solar and wind farms are proliferating and increasingly taking up land worldwide, prompting criticism from rural communities and environmentalists. Solutions range from growing crops or grazing livestock under PV panels to putting floating solar farms on lakes and reservoirs.

BY FRED PEARCE · FEBRUARY 20, 2025

4) What we've done in 2025 so far:

- Press releases: 4
- Regulatory accountability action items: 3
- News articles & op-eds: 7
- Events: 1

Major highlights:

- Advocated for environmental accountability in Mundy Township with EGLE
- Broke statewide news of FGEA's environmental violations on the Mundy megasite
- Wrote a letter of demand regarding Gotion to the MEDC
- Lobbied in Lansing directly with legislators regarding Big Rapids, Marshall, Mundy Township, and the Regenerative Agriculture Megasite model

And much more that's in process.

EGLE swoops in on Mundy megasite

Great Lakes department alleges wetland violations at site that is getting \$259 million subsidy despite having no buyer

By Scott McClallen | April 21, 2025

Courtesy of Don Ludwig

ument, Great Lakes and Energy says regulators found a few wetlands violations during a visit to the Mundy

NDY TOWNSHIP, Mich. (WJRT) - Developers clearing land at the Mundy township megasite received a violation notice this week from the Michigan Department of Environment, Great Lakes and Energy.

5) What we want to do next

Internal:

- Develop & sell **merchandise**:
 - publish an activity book about Michigan's water and ecosystems (& plan other titles)
 - hold an artwork contest to gather art for merchandise
 - sell & fulfill yard signs, books, and merch
- **Buy** equipment to facilitate EDRA of MI's outreach (laptops, phones, mics, etc)

External:

- **Educate** residents, officials/legislators, and investors on how the Regenerative Agriculture Megasite model could solve local economic development needs
- **Lobby** legislators, the MEDC, and public officials to invest in regenerative agriculture businesses, infrastructure, and policies
- **Build** relationships with investors for seed and capital funding for Regenerative Agriculture Megasites, events and other community-led development projects

6) How can you help?

- **Donate** money (for tech, travel, and merch inventory)
- **Volunteer** skills:
 - graphic design
 - writing/communication
 - social media (Instagram/TikTok)
 - investigative research
- **Learn** about & share the model for the Regenerative Agriculture Megasite
- **Organize** free local events in your community (we can help!)
- **Connect** us with investors (fund managers, philanthropists, corporate funders)
- **Tell your legislators** about us—and about your support for bringing the Regenerative Agriculture Megasite model to your community

**Build a legacy that matters.
Join us.**
