

3 in 1 Data Science Course

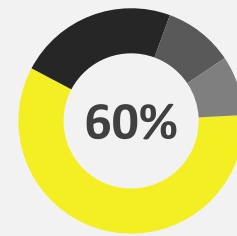

Industry Expert Instructors

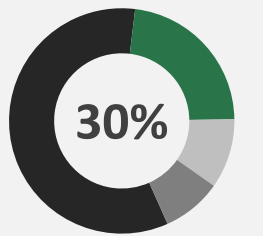

- 20 Hours Live classroom Sessions
- Work on Industry-specific Use Cases
- Make you Industry Ready

Instructor's Contribution

Statistics + Python (Data Manipulation)

Machine Learning + Data Visualisation

Data Innings

Unified Platform for Data Enthusiasts

Get Acquainted with End-to-End Data Science lifecycle within 20 Hour

Statistics + Python

Basic building blocks for you Data Science Journey

10%

Basics of Statistics

50%

Data Cleaning, Data Manipulation, EDA using Python

20%

Basics of Machine Learning

10%

Data Virtualisation Using Python

ML + Data Visualization

Level up in your Data Science Journey

■ Instructor ■ Skills Part1 ■ Skills Part2

TABLEAU CRASH COURSE

INTRODUCTION TO DATA VISUALISATION

- Introduction to data visualisation
- Understanding Tableau ecosystem in industry
- Understanding data files in Tableau
- Creating first visualisations

TABLEAU OPERATIONS

- Introduction to calculations: Data Calculations
- Using LOD calculations: INCLUDE, EXCLUDE & FIXED functions
- Working with table calculations
- Exporting data from tableau

TABLEAU DESKTOP INTERFACE

- Walkthrough of the Interface

HANDLING DATA IN TABLEAU

- Introduction to SQL joins
- Performing data blending in Tableau
- Creating dual axis charts in Tableau

TABLEAU DASHBOARD

- Introduction to principles of dashboard design
- Developing dashboard products using Tableau
