

## AUGER BITS - STANDARD

### EDGE® STANDARD AUGER BITS

The EDGE standard auger bits feature a reinforced fabricated boring head, double wrapped 5/16" fluting and heat treated teeth with a "fishtail" center point. They are approximately 50" in overall length and are available for round or hex drive augers.

### AUGER BIT BASICS

EDGE offers the following types of auger bits: tree and shrub, rock and frost. The auger bits are available in sizes ranging from 4" to 36". The tree and shrub auger bit is designed with smaller diameter auger fluting at the bottom to leave space for root balls, fertilizer or mulch. Rock auger bits have conical (also called "bullet") teeth to cut through the toughest ground and are available with standard, "fishtail" or conical center points. Other auger accessories include auger extensions and auger adapters for round to hex, hex to round and 2" round.

### SPECIFICATIONS

Model	Weight (lbs/kg)	No. of Teeth	Tooth Style
SQ4	51	0	Standard
SQ6	54	2	Standard
SQ9	89	4	Standard
SQ12	110	4	Standard
SQ15	131	6	Standard
SQ18	468	6	Standard
SQ20	180	7	Standard
SQ24	205	9	Standard
SQ30	265	11	Standard
SQ36	340	13	Standard
SQ42	437	16	Standard
SQ48	480	18	Standard

### FEATURES

- Reinforced fabricated boring head
- Double wrapped fluting
- Heat treated replaceable teeth with "fishtail" center point
