

## UFH-MDK manifold

The latest evolution in engineered composites: the Henco MDK manifold. Thoroughly tested in the European markets, with over 80.000 pieces sold and now also available in North-America. The composite material offers unparalleled resistance against corrosion and condensation. The modular setup allows for easy exchange of components or extensions.

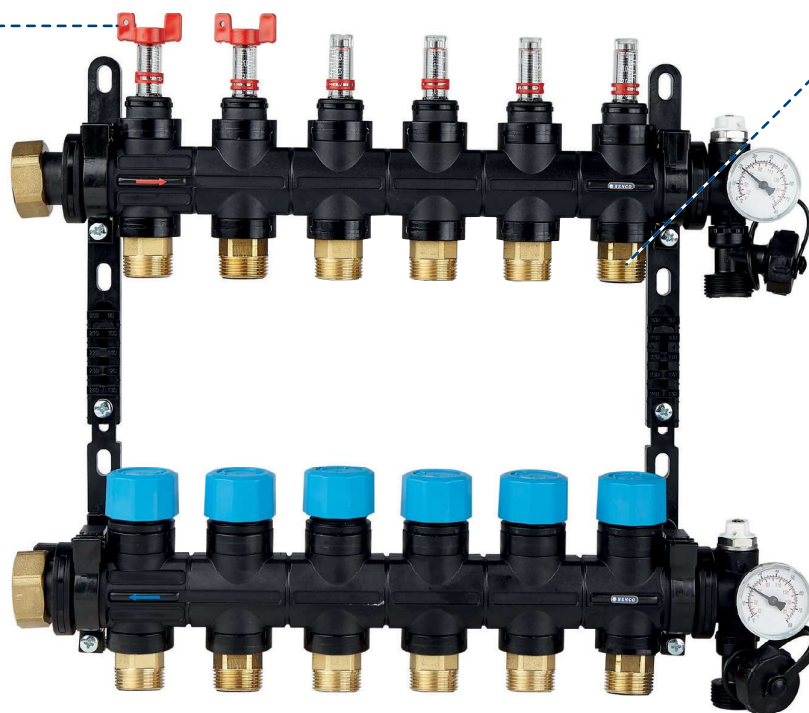

### Flowmeter

Easy flow setting for improved hydronic balancing

### Pipe connector

Freely rotating pipe connector avoids damaged connection

### Extendable

Extension possible up to 15 loops

### Modular system

Replace component with simple clips
