

# FREE DEVELOPMENTAL SCREENINGS

for children 6 months to 5 years old

## DID YOU KNOW:

The first 5 years of a child's life is most important to development & school readiness.

Parents are often the first to become concerned with their child's development.

Routine pediatrician visits alone are not enough to identify most delays early, which is not visible to the eye.

Developmental screenings do not require prior approval or authorizations.

**Your child's first years are the most important to healthy development**
