

Ubiquitous! They need to be as everyday as the USB connector on your other everyday essentials, or the plug for your toaster.

ADJECTIVE: present, appearing, or found everywhere.

The worker bees should drive EVs too. And plug in at the workplace.

Here's the thing. All those Teslas on the road and in neighborhoods that are a little better off, are expensive. Most of us (the worker bees) won't go for a \$700/mo. car payment. But then...two or three hundred a month for gas? What if it was no gasoline and a few bucks, (or no bucks) for electricity, and just a \$300 car payment? Oh, and you live in a condo or apartment? Hmmm...

What a perk! Cost your company about as much as a half slice of pizza! Worth a whole lot more to you and me, the worker bees.

eCharge Advisor

First Look

... at your place, *your* workplace.
...a conversation with *your* people.
...to help you decide...if you want a closer look.

First Look is free!

Not a **treehugger's fantasy.**
EV...and maybe PV too.

The old way, ICE (internal combustion engine) and fossil fuel for everything, is expensive. **You don't have to do it the old way!**

And you don't need your own solar panels to save money and be part of the climate solution. Even if all your electricity is generated with natural gas, in an EV you'll be a better carbon citizen. And you will save money!

Save the Earth!

Save Money!

Have Fun!

Maybe you won't get one exactly like this, electric zoom for \$30,000 and more than 200 miles range. Available in the UK, but not here. But others are coming. Chevy Bolt is a wonderful drive for under 30K. And Volkswagen and Nissan and Rivian and the Ford Lightning! Lots of choices and Uncle Sam will make it easier by giving you a credit against your tax bill.

And **wouldn't it be nice** if there was one of these at every slot in the company lot?

What Advisor will do...if you're ready to take the next step. The fee is \$500. It's a handshake agreement, and you pay only if you're satisfied.

- Advisor will spend a week digging into the nuts and bolts. How to bring a bunch of chargers to your place.
- Consult with company managers--Finance, HR, Facilities, and others outside the company, including vendors and the utility.
- Do some number crunching. You know there will be environmental benefit, but before moving ahead you need a cost benefit analysis in dollar terms.
- Create a written report which is your property. The report will also be delivered, if you like, as a presentation at an in-person meeting or Zoom call.
