

Pre-First Look Checklist

Recommended:

- Take a walk around your parking lot.
 - How many total slots?
 - Any obvious place for the first group of 4 or 8 chargers?
 - How far is it from the building...where the electricity will come from?
 - Any obvious place to **not put chargers?** Where they pile the snow, or where it floods?
 - Be a real visionary. Imagine five years from now, half the cars EVs. And **a parking shelter with solar panels on the roof!** Sorry, dreamer here.
- Talk to the VIPs, like the property manager, president of the homeowners association or owner of the place.
 - The facilities director: Receptive?, or a **grumpy** old somebody you'd rather not bother?
 - The HR director: Do they get it? Know GEN Z smarties will drive EVs?
 - **Your boss:** A **generous** one might even pay for the electricity.
 - Your coworkers: Some are on the same page. How far do they drive?
 - Anybody else who already drives an EV.
- Ask around the neighborhood.
 - What do **your kids** think of the idea?
 - What do other people who already drive an electric have to say?

Pretend you're talking to your grandkids about climate change.
