CakeSwap

DECENTRALIZED EXCHANGE
DEFI, YIELD FARMS, POOLS

What is CakeSwap?

CAKESWAP, a native utility token of CakeSwap Exchange, it's used for a variety of purposes within the growing landscape. Its main functions are yield farming and staking.

CakeSwap is a type of decentralized exchange (DEX) known as an automated market maker (AMM). This essentially means that there are no order books, bid/ask system or limit/market orders. Instead, users trading on the platform automatically draw liquidity from one or more liquidity pools, which then rebalance after the trade is complete.
