

Neural Manipulation addresses the mechanical restrictions of the neural system with manual techniques to enhance optimal neural mobility and function through common fascial entrapment zones.

Develop a better understanding of the treatment of nerves. Hear about research and a case study. Enhance your hands-on skills by learning how to utilize neural manipulation techniques.

**Taught by
Veronika Campbell, PT, MPT, CSCS, NCS, CNMP**

Intro to Neural Manipulation

Saturday September 8th 1-4:30pm

Early Bird \$39/after August 8th \$49

Hands-on lab. Please wear or bring shorts.
